**Beyond Modularity** Annette Karmiloff-Smith, 1995-09-25 Taking a stand midway between Piaget's constructivism and Fodor's nativism Annette Karmiloff Smith offers an exciting new theory of developmental change that embraces both approaches She shows how each can enrich the other and how both are necessary to a fundamental theory of human cognition Karmiloff Smith shifts the focus from what cognitive science can offer the study of development to what a developmental perspective can offer cognitive science In *Beyond Modularity* she treats cognitive development as a serious theoretical tool presenting a coherent portrait of the flexibility and creativity of the human mind as it develops from infancy to middle childhood Language physics mathematics commonsense psychology drawing and writing are explored in terms of the relationship between the innate capacities of the human mind and subsequent representational change which allows for such flexibility and creativity Karmiloff Smith also takes up the issue of the extent to which development involves domain specific versus domain general processes She concludes with discussions of nativism and domain specificity in relation to Piagetian theory and connectionism and shows how a developmental perspective can pinpoint what is missing from connectionist models of the mind *Beyond Modularity*, 1999
