Corbusier Guide:

The Le Corbusier Guide Deborah Gans, 2014-05-16 The Le Corbusier Guide presents the architecture of Le Corbusier. The focus is on Paris given that it is his adopted city and the place where he came of age. Within its environs is a representative sample of his built work. It contains most of his purist houses and an early foray away from the crisp surfaces of Purism. This itinerary follows the outlines of Le Corbusier's life's work. Beginning at his birthplace in La Chaux de Fonds, Switzerland, the route continues to Paris, to the perimeter of France, and finally to the international scene. Architects' architecture. Paris. Also presented are Le Corbusier's work in Switzerland, Belgium, Germany, Italy, United States, Argentina, Brazil, Tunisia, Iraq, Japan, USSR, and India. The itinerary includes not only the buildings but also the process of getting from one to the next. On the open road, it is a pleasure to remember Le Corbusier's own joy of self-propulsion in the automobile, efficiency and speed in the train, and the thrill of flight as he experienced it with the poet of flight Antoine de Saint-Exupéry. All these mimetic pleasures are ancillary to the experience of the buildings in situ in their complex relationship to local landscape, national spirit, and international vision.

The Le Corbusier Guide Deborah Gans, Le Corbusier, 2006. A picture may be worth a thousand words, but there is no real substitute for personal experience, and anyone who has visited Le Corbusier knows just how true this is. This architectural guide tells you everything you need to know to get to his buildings, including maps, directions, and visitor information.

Corbusier: the Villa Savoye Jacques Sbriglio, 2010-07-15. With its clear construction, the Villa Savoye, completed in 1931, established Le Corbusier's and Pierre Jeanneret's reputation as an undisputed master of twentieth-century architecture. In this guide, historic documents and new photographs provide an in-depth presentation both to visitors to the site and to interested readers at home.

Le Corbusier Jacques Sbriglio, 2004-01-01. Whilst focused primarily on the Unité d'Habitation in Marseilles, built between 1945 and 1952, this guide also encompasses an overview of the four other Unité blocks built by Le Corbusier in France and abroad. In many ways, it represents the culmination of Le Corbusier's research into housing, a period of studies and writings that lasted almost half a century. Over the fifty years of its existence, the Marseilles Unité has continually kindled intense debate and interest. It is now ranked among the world's greatest architectural works, proving should proof still be required, Le Corbusier's belief that housing is an essential ingredient of architecture, and vice versa.

Le Corbusier's Maison Curutchet Alejandro Lapunzina, 1997. One of his very few built projects in the Americas, Maison Curutchet is a fascinating representation of Le Corbusier's stylistic transitional period, bridging his late 1920s purism and the maturity of his later work in India. Like Casa Malaparte, this book offers an in-depth analysis of a single building through original documents, drawings, and photographs.
