cities capacities to act as international actors The book demonstrates that the participation of Greek municipalities in European city networks has entailed changes to local political structures policies and procedures as well as the strengthening of a European identity and the creation of long term partnerships At the same time these changes have often clashed with bureaucratic traditions and unfavorable economic conditions which have mitigated the reformatory potential of European city networking Providing important insights into city diplomacy and Europeanization the book will appeal to scholars and students of public administration European integration and political science as well as professionals and practitioners   Mathematical Reviews ,2007   Catalog of Copyright Entries.
