Advanced Flash 5 Introduction To Actionscripting:

Flash 5 Hands-on Training Kymberlee Weil, Garo Green, Lynda Weinman, 2002 Untitled Flash 5 Hands on Training is a tutorial based learning tool for beginning Flash designers from Lynda Weinman's best selling Hands on Training series. With no prior experience using Flash, users will be led through a series of exercises that start quite simply and increase in complexity until they have learned how to use all of the basic tools in Flash 5. Beginning with the drawing tools, users will learn how to create art and basic shape tweens, convert their art to symbols, and then create motion tweens and gradually build more complex animations and buttons by learning how to use multiple scenes, layers, movie clips, and the basic ActionScripting features that ship with the program. Like the other books in the Hands on Training series, this book comes with a companion CD ROM that includes a trial version of the software, the complete exercise files, and QuickTime movies featuring demonstrations from the authors.

Flash 5 Advanced for Windows and Macintosh Russell Chun, 2001 This guide covers advanced features and techniques of Flash and offers a more general strategy to Flash problem solving. It demonstrates ways to approach animation and interactivity, encouraging users to begin to think in Flash. The Visual QuickPro Guide uses the same task based visual reference format of the Visual QuickStart Guide series.

Fundamentals of ActionScript 3.0 Doug Winnie, 2011-07-11 Adobe Flash Professional is the most popular software available for creating animations for the Web. Most people start using Flash to create vector based animations that output small file sizes, perfect for the Web. Later they want to branch out into creating rich interactive experiences for websites and mobile devices, and for that they need to learn ActionScript. Doug Winnie draws on the experience he's gained from his years as an educator to teach not only what ActionScript can do, but also to show how the code works. This gives the reader a deeper understanding of how ActionScript functions and gives them the power to come up with original solutions when creating their own projects. Doug's book dives right into the concepts of manipulating Flash objects and the fundamentals of functions and mathematical operators. After presenting events and using scripts to control the Flash timeline, classes and conditionals are covered in depth. The final part of the book covers creating desktop applications with Adobe AIR, developing mobile applications, and working with external code libraries. Real world projects are sprinkled generously throughout the book, and Appendices include information on debugging, deciphering documentation, and using Adobe Flash Builder as an ActionScript development environment.

Web Design in a Nutshell Jennifer Niederst Robbins, 2001 An introduction to designing web pages that includes information on using HTML format, creating graphics, choosing the right audio and video accents, and other related topics.
