

Child With Cancer

David Bearison

Child With Cancer:

My Child Has Cancer Della L. Howell, 2008-03-30 They are four words that can terrify any parent to the core Your child has cancer Each year more than 13 000 children and teenagers are diagnosed with cancer in the United States The shock and demands of that diagnosis can be overwhelming for the parents children family and friends as they face the emotions along with the need to understand what the diagnosis means as well as what treatments are available and which are right for them Parents family members friends and professionals in healthcare will find support in this book Written by a specialist in Pediatric Oncology who is herself a cancer survivor as well as the mother of three young children this book is clearly stated and offers comprehensive information about the cancers that strike our youngest They are four words that can terrify any parent to the core Your child has cancer Each year more than 13 000 children and teenagers in the United States are diagnosed with cancer The shock and demands of that diagnosis can be overwhelming for the parents children family members and friends as they face the emotions along with the need to understand what the diagnosis means what treatments are available and which are right for them In this book there is support for all Written by a specialist in Pediatric Oncology who is herself a cancer patient as well as the mother of three young children this guide offers clearly stated and comprehensive information about the cancers that strike our youngest Dr Howell explains the 12 types of childhood cancer with leukemias and tumors of the brain and nervous system most common She tells us what the overall prognosis is and how cancers affect children differently than they do adults as well as what little is known about the causes and she details the controversies on that subject Howell explains common procedures and tests before during and after therapy as well as the potential side effects This compassionate physician does not ignore the vitally important issues of emotion how to find the calm and strength to help the child or teen and be his or her best advocate how to tell the child the diagnosis what questions to anticipate and how to deal with other family members and friends *Talking with Your Child about Cancer* ,1986

Children With Cancer Christine Eiser, 2004-04-12 Cancer is a very rare disease in children There have been impressive gains in survival in recent years and these have been achieved through the use of chemotherapy and national and international clinical trials The diagnosis of cancer in a child imposes considerable stress on the whole family In the immediate time after diagnosis parents must learn about the disease and its treatment explain what is happening to the child and make arrangements for the care of other children in the family For the child treatment is associated with many side effects depending on the specific drugs used In addition the child is prone to infection and therefore is likely to miss a lot of school and other activities For all these reasons physicians and families have become aware that cancer has huge implications for the quality of the child s life This book is an attempt to describe how quality of life is affected at different stages of the disease process Comprehensive reviews are provided of the impact on the child s physical activity social life and school and educational achievements Special consideration is given to children with leukemia one of the more common

cancers and brain tumors Cancer does not just affect the child but every member of the family Consequently there is coverage of the effects on parents and also healthy brothers and sisters To the extent that improvements in survival have been achieved by national and international collaboration between clinicians it is concluded that efforts to improve the quality of these children s lives is dependent on collaboration between clinicians nurses and behavioral scientists at national and international levels This book should provide an impetus for such collaboration *100 Questions & Answers about Your Child's Cancer* William L. Carroll, Jessica B. Reisman, 2005 This book is an invaluable resource for anyone coping with the physical and emotional turmoil of this frightening disease t My Child Has Cancer Della Howell, 2008-03-30 They are four words that can terrify any parent to the core Your child has cancer Each year more than 13 000 children and teenagers are diagnosed with cancer in the United States The shock and demands of that diagnosis can be overwhelming for the parents children family and friends as they face the emotions along with the need to understand what the diagnosis means as well as what treatments are available and which are right for them Parents family members friends and professionals in healthcare will find support in this book Written by a specialist in Pediatric Oncology who is herself a cancer survivor as well as the mother of three young children this book is clearly stated and offers comprehensive information about the cancers that strike our youngest They are four words that can terrify any parent to the core Your child has cancer Each year more than 13 000 children and teenagers in the United States are diagnosed with cancer The shock and demands of that diagnosis can be overwhelming for the parents children family members and friends as they face the emotions along with the need to understand what the diagnosis means what treatments are available and which are right for them In this book there is support for all Written by a specialist in Pediatric Oncology who is herself a cancer patient as well as the mother of three young children this guide offers clearly stated and comprehensive information about the cancers that strike our youngest Dr Howell explains the 12 types of childhood cancer with leukemias and tumors of the brain and nervous system most common She tells us what the overall prognosis is and how cancers affect children differently than they do adults as well as what little is known about the causes and she details the controversies on that subject Howell explains common procedures and tests before during and after therapy as well as the potential side effects This compassionate physician does not ignore the vitally important issues of emotion how to find the calm and strength to help the child or teen and be his or her best advocate how to tell the child the diagnosis what questions to anticipate and how to deal with other family members and friends They Never Want to Tell You David Bearison, 2013-10-01 They Never Want to Tell You transcends the negative metaphors and clichés of life threatening disease to give voice to the culture of cancer and to the behavior and attitudes of those who function within that culture as patients medical professionals family and friends In these extraordinary narratives children coping with cancer reveal their most personal experiences and they speak with a candor that breaks through the cultural taboos ostensibly designed to protect us from the disease The rich compassionate and honest words of these children give

expression to concerns that adults who are struggling with cancer find nearly impossible to articulate Free of social conventions and cognitive distortions each story presents a powerful variation on the theme of survival in the face of the continuing uncertainties of life threatening disease Bearison a developmental psychologist and psychotherapist is keenly aware of the psychological impact of cancer on children particularly as survival times for childhood cancers lengthen and complex treatments intensify concern about the emotional not merely physical well being of children Bearison has culled from scores of interviews the most salient moments that represent these individual children in their shared struggle with disease In these pages the children express their wildest hopes and worst fears about cancer They speak of the absolute necessity of full disclosure the problems of relating to friends and family the difficult adjustment to hair loss their feelings of punishment grief and spirituality and many other issues In the course of these stories the children reveal not only their will to survive and their extraordinary capacity to understand themselves and their condition but their altruistic desire to share that understanding with other children as well as with adults who have cancer They Never Want to Tell You is rich and rewarding reading for cancer patients their families and health care professionals alike Childhood Leukemia Nancy Keene,2018

Approximately 3 300 children are diagnosed with leukemia in the United States each year The illness and its treatment can have a devastating effect on family friends schoolmates and the larger community This newly updated edition of Childhood Leukemia contains the information and support parents need during this difficult time Author Nancy Keene provides parents and family members with Updates on treatment including stem cell transplants information about tailoring drugs dosages to children s genetic profiles and new methods for dealing with side effects Practical advice on how to cope with medical procedures hospitalization school family and financial issues Suggestion son ways to form a partnership with the medical team Stories from family members who have coped with leukemia and its treatments Updated resources for medical information emotional support and financial assistance A pull out medical record keeper Parents who read this book will find understandable medical infomation obtain advice that eases their daily life and feel empowered to be strong advocates for their child **Educating the Child with Cancer** Nancy Keene,2011 Developed to help families and teachers cope with all aspects of educating a child with cancer this book covers learning issues from infancy through adulthood Chapters written by experts are balanced by the wisdom of parents who have been there **Children with Cancer** Jan van Eys,2012-12-06

Probably no two topics have generated more workshops con ferences and lectures in medicine and education than the chron ically ill child and the mandate of Public Law 94 142 In spite of the numerous examinations of these topics there has never been a serious dialogue between medical professionals and educators with the child as the focus These proceedings represent such a unique event The paradigm of the medically exceptional child is the child with cancer a child with a life threatening illness but also a child with a high probability of being cured of this acute disease Such a cure is purchased at a cost of late sequelae of disease and treat ment alike There is prejudice against this child There is overt physical

exceptionality Therefore the Fifth Annual Mental Health Conference of The University of Texas System Cancer Center Department of Pediatrics was a stimulus to generate this dialogue When two nationally recognized giants in their respective fields The University of Texas System Cancer Center and the Houston Independent School District address a problem the result transcends local concern This conference goes far beyond the problem of the child with cancer to deal with all medically exceptional children The focus on the needs and expectations for the child makes this workshop universal in application

What Happens When a Kid Has Cancer Sara Olsher,2021 When a child is diagnosed with cancer life flips upside down Suddenly our days and our thoughts are dominated by doctors nurses child life specialists and a million technical terms that will make anyone s head spin Add extreme fear and anxiety to that and you ve got a recipe for the most stressful time in a family s life What Happens When a Kid Has Cancer is a book written with purpose of relieving the anxiety and confusion that comes from a child s cancer diagnosis and treatment What Happens When a Kid Has Cancer covers the main points of pediatric cancer what it is and what the experience of treatment is like and shows how it can change a kid s day The book is great for ages 4 10 and discusses The science of cancer Changes to routines Surgery and anesthesia Chemotherapy Hair loss and hair changes Port central line and tubies Hospital stays Radiation Scans and blood draws Emotions relating to cancer Over the course of a year and with the help of both experts and families who have been through pediatric cancer author and illustrator Sara Olsher explains the science of cancer in an age appropriate totally non scary way and uses an illustrated calendar to show how various treatments affect a child s day to day This method of teaching is based on decades of solid science about how kids learn and cope with the major day to day changes that result from issues like cancer By creating a routine that kids can see and understand parents can restore a sense of safety and predictability in their kids lives helping them to be more resilient in the face of life s inevitable challenges What Happens When a Kid Has Cancer helps families that want to reduce their kids anxiety surrounding a very scary diagnosis It aims to empower kids with knowledge which is proven to help kids through traumatic situations

Children With Cancer Jeanne Munn Bracken,2010-07-06 Children can and do survive cancer the last decade has seen many major advancements in treatment Written honestly yet in a reassuring tone by a reference librarian whose child has survived cancer *Children with Cancer* draws together a wealth of up to date information essential for anyone who wishes to help a child or family through this ordeal including relatives friends teachers and clergymen as well as doctors nurses and other health care professionals The information ranges from sophisticated hard to find medical facts to practical tips on how to handle side effects and much more Describing in detail the whole range of childhood cancers Bracken explores how they affect the child the treatments available how to cope with the changes this diagnosis will bring to the entire family and where to go for both medical and emotional help It also includes an appendix of common medical tests a glossary of terms and comprehensive lists of organizations clinics and cancer centers complete with names and addresses Reviews of the previous edition A remarkable

job The technical information is clearly stated up to date and accurate But most of all this is a human book Los Angeles Times Comprehensive well written accurate and compassionate Bracken s book can serve as a primary reference for parents and can be used as well by health care professionals and teachers Science Books and Films **Pediatric Cancer Survivors** Karen Wonders,Brittany Stout,2017-06-07 Pediatric cancer develops in 1 to 500 children Typically the type of cancers that develop in children is different than those that develop in adults in that they are often the result of a DNA mutation rather than environmental or lifestyle risk factors Leukemia brain and central nervous system tumors and neuroblastomas are the most common cancer types in child populations Children tend to respond better to anticancer treatments including chemotherapy and radiation However long term side effects are common in children often requiring follow up care and lifestyle intervention for the rest of their lives The percentage of 5 year survivors was over 50% for the most common cancers This suggests that a majority of cancers in this population are highly survivable As such research should focus on aspects of survivorship for these individuals This book will explore issues related to pediatric cancer and their associated treatments

Understanding Abnormal Child Psychology Vicky Phares,2007-04-27 Now in its second edition this comprehensive book explores developmental psychopathology as a means for understanding and treating abnormal behavior in children It covers the strengths and healthy outcomes as a means for designing effective therapies to help children and families while also focusing on prevention as a cornerstone of managing child behavior Special attention is also given to issues of diversity inclusion and understanding *Hope for Families of Children with Cancer* Lynda T. Young,Johnathan Ward,2010-05-25 Im sorry to tell you thisyour child has cancer Each year in America those devastating words thrust parents of more than 12 000 children and adolescents into a frightening dark tunneldramatically changing the dynamics of each family Because childhood cancer attacks quickly and unexpectedly parents reel bombarded with information regarding treatments tests and decisionsas parents echo Ive never felt so alone I feel like Im in a fog From the initial diagnosis and throughout the daunting journey the twelve chapters and resources in *Hope for Families of Children with Cancer* weave advice support and hope from fellow travelers and professionals who come alongside through encouraging short stories refreshing helpful hints and inspiring scriptures and prayers Many weary parents pull apart as communication breaks downsometimes far apart An added study You niquely Made helps family members appreciate different personalities and methods of coping Overwhelmed families find comfort and courage as writers deal with the struggles parents face balancing needs of their child family the set aside spouses and the invisible onessiblings and selfthe caregiverthe new normal of childhood cancer Unfortunately 35 of cancer children die Heartfelt stories include stages of grief turning the corner and battling unexpected waves of grief that continue *Making Better Drugs for Children with Cancer* National Research Council,Institute of Medicine,National Cancer Policy Board,Committee on Shortening the Time Line for New Cancer Treatments,2005-03-31 The successes that have been achieved in treating childhood cancers stand as beacons against the less dramatic improvements for adults with cancer

Progress began to accelerate in the 1960s and 1970s as treatment regimens were built up primarily by building combinations of chemotherapeutic drugs. However, the near absence of research in pediatric cancer drug discovery threatens to halt the progress in childhood cancer treatment achieved during the past four decades. *Making Better Drugs for Children with Cancer* identifies the major issues to be addressed in developing new agents for childhood cancers, the gaps in research and development, and the steps that have been suggested to move the process forward. This report also makes a new proposal to capitalize on today's science to bring new treatments to children's cancers. **A Child Shall Lead Them** Diane M. Komp, 1993. Sometimes life's most important lessons come from the least expected sources. In a story of love and hope, the author of *A Window to Heaven* presents surprisingly joyful and life-affirming insights gleaned from fragile young cancer patients. Childhood Cancer Survivorship National Cancer Policy Board, Susan L. Weiner, Maria Hewitt, Joseph V. Simone, 2003-12-31. Commissioned by the National Cancer Policy Board, the nine chapters in this report explore the medical, social, and economic consequences of surviving childhood cancer, identify essential elements of quality care, assess the status of applied clinical and health services research, and propose policies to improve the quality of life for childhood cancer survivors and their families. No index is provided. Annotation 2004. Book News, Inc. Portland, OR. booknews.com **Nursing Care of the Child with Cancer** Association of Pediatric Oncology Nurses (U.S.), 1993. Content specific to cancer in adolescents has been interspersed into this edition, highlighting the differences in child and adolescent cancer and treatment. In addition to discussing common and rare diseases, chapter by chapter, this text addresses professional practice issues such as interdisciplinary collaboration, research, and ethics, as well as actual case studies and accompanying patient photographs that highlight the personal approach that is needed in child and adolescent cancer nursing. *Cyclopædia of the diseases of children, medical and surgical v. 3, 1892-94*, 1890. *Pediatric Psychooncology* David J. Bearison, Raymond K. Mulhern, 1994-05-26. Twenty to thirty years ago, the prognosis for children with cancer was dismal. Since then, remarkable advances in the treatment of childhood cancers have resulted in overall cure rates of 60 percent. In response to these improved prognoses, psychological frontiers of patient care and clinical research have evolved. Psychologists, as well as mental health professionals from other disciplines, are now routinely included in medical treatment planning and patient care. Psychosocial interventions with pediatric cancer patients and their families are guided by an increasingly sophisticated body of research findings that enhance their quality of life. With contributions from nationally recognized clinicians and researchers, this volume addresses the wide range of psychological issues inherent in pediatric oncology, including coping with pediatric cancer, pain and symptom management, medication compliance, neuropsychological effects of disease, and therapy, sibling and family relations, bereavement, and care of the dying child. Each author carefully defines his or her research area, discusses theoretical and methodological concerns, critically reviews and integrates research findings, and discusses unresolved issues as well as future directions for research. This balanced and comprehensive overview of pediatric

psychooncology is essential reading for all those interested in the treatment of children diagnosed with cancer

Reviewing **Child With Cancer**: Unlocking the Spellbinding Force of Linguistics

In a fast-paced world fueled by information and interconnectivity, the spellbinding force of linguistics has acquired newfound prominence. Its capacity to evoke emotions, stimulate contemplation, and stimulate metamorphosis is actually astonishing. Within the pages of "**Child With Cancer**," an enthralling opus penned by a very acclaimed wordsmith, readers attempt an immersive expedition to unravel the intricate significance of language and its indelible imprint on our lives. Throughout this assessment, we shall delve in to the book is central motifs, appraise its distinctive narrative style, and gauge its overarching influence on the minds of its readers.
