[Dreaming](#) J. Allan Hobson, 2002 What is dreaming Why are dreams so strange and why are they so hard to remember In this fascinating book Harvard researcher Allan Hobson offers an intriguing look at our nightly odyssey through the illusory world of dreams Hobson describes how the theory of dreaming has advanced dramatically over the past fifty years sparked by the use of EEGs in the 1950s and by recent innovations in brain imaging We have learned for instance that in dreaming some areas of the brain are very active the visual and auditory centers for instance while others are completely shut down including the centers for self awareness logic and memory Thus we can have visually vivid dreams but be utterly unaware that the sequence of events or locales may be bizarre and quite often impossible And because the memory center is inactive we don't remember the dream at all unless we wake up while it is in progress Hobson also shows that modern research has disproved most of Freud's The Interpretation of Dreams as one scientist put it Freud was 50% right and 100% wrong but we have gained new insight into the nature of mental illness The book also discusses dream disorders nightmares night terrors sleep walking the possible link between dreaming and the regulation of body temperature the effects of sleep deprivation and much more With special boxed features that highlight intriguing questions Do we dream in color yes Do animals dream probably Do men and women dream differently no Dreaming offers a cutting edge account of the most mysterious area of our mental life

Machine Dreaming and Consciousness J. F. Pagel, Philip Kirshtein,2017-04-13 Machine Dreaming and Consciousness is the first book to discuss the questions raised by the advent of machine dreaming Artificial intelligence AI systems meeting criteria of primary and self reflexive consciousness are often utilized to extend the human interface creating waking experiences that resemble the human dream Surprisingly AI systems also easily meet all human based operational criteria for dreaming These dreams are far different from anthropomorphic dreaming including such processes as fuzzy logic liquid illogic and integration instability all processes that may be necessary in both biologic and artificial systems to extend creative capacity Today multi linear AI systems are being built to resemble the structural framework of the human central nervous system The creation of the biologic framework of dreaming emotions associative memories and visual imagery is well within our technical capacity AI dreams potentially portend the further development of consciousness in these systems This focus on AI dreaming raises even larger questions In many ways dreaming defines our humanity What is humanly special about the states of dreaming And what are we losing when we limit our focus to its technical and biologic structure and extend the capacity for dreaming into our artificial creations Machine Dreaming and Consciousness provides thorough discussion of these issues for neuroscientists and other researchers investigating consciousness and cognition Addresses the function and role of dream like processing in AI systems Describes the functions of dreaming in the creative process of both humans and machines Presents an alternative

Allan Hobson,2011-03-11 A pioneer in sleep and dream science surveys his life and work through the lens of dreaming and consciousness J Allan Hobson s scientific experimentation began in childhood with a soot filled investigation into the capacity of a chimney to admit Santa Claus He discovered that even with the damper open the chimney was far too narrow Hobson s life as an experimentalist has continued through a pioneering career devoted to aligning psychology and biology and to investigating the relationship of dreaming and consciousness In *Dream Life* Hobson conducts an experimental investigation into his life and work Hobson charts his developing consciousness through a vividly imagined conception in October of 1932 birth and babyhood offering a theory about protoconsciousness in fetuses and infants He recounts his youthful zeal for scientific discovery his early sexual experimentation and his education He describes taking on the entrenched Freudians at Harvard Medical School in the 1950s as a maverick psychiatrist who wanted to replace psychoanalysis with biological science He describes his further studies his marriages and love affairs his travels and what he learned about the brain from his whiplash induced amnesia after a 1963 automobile accident and from his brain death after a stroke in 2001 Through it all Hobson uses his life as the ultimate case study for his theory that REM sleep provides a test pattern that allows the brain to develop offline Dreams most intense in REM sleep when the brain is active need no Freudian style decoding he says Dreaming is a glorious mental state to be enjoyed and studied for what it tells us about consciousness *The Matter of Vision* Peter Wyeth,2015-02-27 A filmmaker draws on the fields of neuroscience and evolutionary biology to focus on cinema s visual nature Cinematic analysis has often supported the notion that cinema can be understood by drawing parallels with language Peter Wyeth contends that this analytical framework often fails to consider the fundamental fact of cinema s visual nature In *The Matter of Vision* Wyeth seeks to redress this oversight by grounding his analysis in neuroscience and evolutionary biology finding herein the potential for a qualitatively superior understanding of the cinematic medium **Why We Dream** Alice Robb,2023-12-05 Science journalist and lucid dreamer Alice Robb explores fresh revelatory research to uncover why we dream and how we can improve our dream life **What Do Dreams Do?** Sue Llewellyn,2020 Dreams are a puzzle We don t know what to make of them This book explores the evolutionary significance of dreaming its role in memory unconscious prediction creativity and psychiatric illness It will be compelling reading for anyone interested in psychology psychiatry consciousness and the arts **Dreams of Escape** Sally Kairouz,2025-02-11 Your dreams aren t random they re messages guiding you from confusion to clarity Three years trapped in an abusive relationship led to Sally s discovery and the unraveling of her documented dreams and nightmares After years of dream analysis and interpretation for herself and others Sally discovered a startling new insight into dreaming which is yet to be explained Lucid dreaming is the theory that one is aware they are dreaming and they can take control During a terrifying lucid dreaming experience Sally discovered she
