debilitating battle injuries Many of them faced a new more pernicious slow killing enemy the cancerous effects of Agent Orange Originally introduced by Dow and other chemical companies as a herbicide in the United States and adopted by the military as a method of deforesting the war zone of Vietnam in order to deny the enemy cover Agent Orange also found its way into the systems of numerous active duty soldiers Sills argues that manufacturers understood the dangers of this compound and did nothing to protect American soldiers Toxic War takes the reader behind the scenes into the halls of political power and industry where the debates about the use of Agent Orange and its potential side effects raged In the end the only way these veterans could seek justice was in the court of law and public opinion Unprecedented in its access to legal medical and government documentation as well as to the personal testimonies of veterans Toxic War endeavors to explore all sides of this epic battle *Agent Orange and the Vietnam Veteran* Caroline D. **Agent Orange** Vance Ferton, The development of Agent Orange emerged from the intersection of wartime necessity and scientific advancement during the early 1960s as American military strategists sought technological solutions to the unique challenges posed by guerrilla warfare in the dense jungles of Southeast Asia The chemical compound that would become synonymous with environmental destruction and human suffering originated in agricultural research laboratories where scientists had been developing herbicides to increase crop yields and eliminate unwanted vegetation The transformation of these agricultural chemicals into weapons of war represented a fundamental shift in military thinking that would have consequences extending far beyond the battlefields of Vietnam The basic chemistry of Agent Orange consisted of a fifty fifty mixture of two synthetic herbicides 2 4 dichlorophenoxyacetic acid and 2 4 5 trichlorophenoxyacetic acid which had been developed during the 1940s as part of agricultural research programs aimed at controlling weeds and increasing agricultural productivity These compounds worked by mimicking natural plant hormones and causing rapid uncontrolled growth that ultimately killed the targeted vegetation When combined in the formulation that became known as Agent Orange named for the orange stripe painted on storage containers these chemicals created a powerful defoliant capable of stripping leaves from trees and destroying crops over vast areas

*Agent Orange* , Presents information about Agent Orange a herbicide used in the Vietnam War 1961 1975 to defoliate trees and shrubbery in order to prevent the vegetation s use as a place to hide Discusses the results of human exposure to the herbicide Includes FAQs maps and descriptions of other herbicides used in Vietnam Explains how to file a U S Veterans Administration VA claim The information is provided by the Lewis Publishing Co
