Lies Scott Alan Johnston, 2022-01-15 Until the nineteenth century all time was local time On foot or on horseback it was impossible to travel fast enough to care that noon was a few minutes earlier or later from one town to the next The invention of railways and telegraphs however created a newly interconnected world where suddenly the time differences between cities mattered The Clocks Are Telling Lies is an exploration of why we tell time the way we do demonstrating that organizing a new global time system was no simple task Standard time envisioned by railway engineers such as Sandford Fleming clashed with universal time promoted by astronomers When both sides met in 1884 at the International Meridian Conference in Washington DC to debate the best way to organize time disagreement abounded If scientific and engineering experts could not agree how would the public Following some of the key players in the debate Scott Johnston reveals how people dealt with the contradictions in global timekeeping in surprising ways from zealots like Charles Piazzi Smyth who campaigned for the Great Pyramid to serve as the prime meridian to Maria Belville who sold the time door to door in Victorian London to Moravian town and other Indigenous communities that used timekeeping to fight for autonomy Drawing from a wide range of

primary sources The Clocks Are Telling Lies offers a thought provoking narrative that centres people and politics rather than technology in the vibrant story of global time telling *NAWCC Bulletin* ,2003 *Canadian Aviation* ,1930 *Le Canada chez soi* Peter E.
