

EMOTIONAL AND BEHAVIOR PROBLEM SCALE-SECOND EDITION (EBPS-2)

Stephen B. McCarney, Ed.D. & Tamara J. Arthaud, Ph.D.

Copyright © 2004

The *Emotional and Behavior Problem Scale-Second Edition (EBPS-2)* was developed to contribute to the identification and service delivery for emotionally disturbed/behaviorally disordered children and adolescents from 7 through 18 years-of-age. Two interpretations of the items on the scale are provided.

The *Theoretical Interpretation* is based on the defined subset of emotional disturbances (EDs) and represents an educational interpretation. Each subscale is associated with one of the five characteristics of emotional disturbances contained in the national definition.

The *EBPS-2* theoretical interpretations subscales are:

- Learning Problems
- Interpersonal Relations
- Inappropriate Behavior
- Unhappy/Depressed, and
- Physical Sensations/Tyres

The *Empirical Interpretation* of the items on the scale represents a factor analysis of meaning of the items into five "clusters" and represents a more clinical perception of the items contained on the scale. Each subscale is associated with one of the "clusters."

The *EBPS-2* Empirical Interpretation subscales are:

- Social Aggression/Conduct Disorder
- Social-Emotional Withdrawal/Depression
- Learning/Comprehension Disorder
- Involvement/Inappropriate, and
- Aggressive/Self-Harmful

During development, the *EBPS-2* was subjected to field testing by 807 teachers from grade levels K-12 which resulted in the 59 items included in the final version of the scale. The *EBPS-2* *National Version* was standardized on a total of 3,980 students distributed across all grade levels, K-12. Demographic characteristics of the standardized population represented national percentages of gender, race, ethnicity, geographic area, and magnitude of poverty.

Internal consistency of the *EBPS-2* *National Version* exceeded .70 for each subscale. The one-item reliability correlations coefficients was .80 for the total score. Coefficients for inter-rater reliability for the subscales ranged from .26 to .51 for all age levels. Construct validity was established through the initial development process. The *EBPS-2* is compared to the Behavior Evaluation Scale-National Version (BES-NV), Form 4 and the Oregon Behavior Rating Scale - School Form (ORSB - School Form) (ORSB - S.F., 1999) as measures of construct validity. Each subscale received a .700 level of correlation when compared to the BES-NV or ORSB-S.F. and the Oregon Behavior Rating Scale - National Form. Item performance correlated positively with total scale performance, further substantiating the initial construction of the scale as a measure of emotional disturbances.

The *EBPS-2* uses binomial-scaled responses. Each item on the *EBPS-2* is rated on a two-point scale from (1) NOT AT ALL PROBLEMATIC to (2) MORE THAN ONE TIME. Following completion of the *EBPS-2*, one page of scores may be obtained. Scoring sheets for each item indicating the frequency and severity of the behavior, subscale raw score sheets and the frequency sheets for each subscale, subscale standard scores by comparison basis for comparison scores, total raw scores by comparison basis for comparison scores, and a percentile graphed index of behavior on all items included within the total score. Using the subscale standard scores, a profile of the student's behavior across the subscales is constructed for both the *Theoretical and Empirical Interpretations*.

The *EBPS-2* takes approximately 20 minutes to complete and can be completed by anyone familiar with the student. The alternate teacher, guidance counselor, or other school personnel. The *EBPS-2* consists of manual and Form Version using forms and National Manual, and the *Emotional and Behavior Problem Scale (EBP and Intervention Manual)*.

The *Emotional and Behavior Problem Scale (EBP and Intervention Manual)* (807 pages, © 2004) includes goals, objectives, and intervention strategies for each behavior on the scale and was designed for the comprehensive development of the student's EBP and intervention program. The *EBPS-2* *Quick Score/Comparison program* provides raw scores by standard scores and total scale-scores and comparison. The computer program for the *Emotional and Behavior Problem Scale (EBP and Intervention Manual)* provides an individualized report of EBP goals, objectives, and intervention strategies selected for a student.

The *EBPS-2* is a validly test designed to meet school personnel by making diagnosis, placement, and programming decisions for emotionally disturbed/behaviorally disordered children and adolescents. The scoring reliability and validity of the scale make the *EBPS-2* an efficient and effective measure of assessing student behavior for educational decision making. The *Emotional and Behavior Problem Scale (EBP and Intervention Manual)* is a must for any school personnel and intervention and intervention strategies for emotionally disturbed/behaviorally disordered students.
