*Spatializing Social Media* Marco Bastos, 2021-08-19 *Spatializing Social Media* charts the theoretical and methodological challenges in analyzing and visualizing social media data mapped to geographic areas. It introduces the reader to concepts, theories, and methods that sit at the crossroads between spatial and social network analysis to unpack the conceptual differences between online and face-to-face social networks and the nonlinear effects triggered by social activity that overlaps online and offline. The book is divided into four sections with the first accounting for the differences between space, the geometrical arrangements that structure and enable forms of interaction, and place, the mechanisms through which social meanings are attached to physical locations. The second section covers the rationale of social network analysis and the ontological differences, stating that relationships, more than individual and independent attributes, are key to understanding of social behavior. The third section covers a range of case studies that successfully mapped social media activity to geographically situated areas and considers the inflection of homophilous dependencies across online and offline social networks. The fourth and last section of the book explores a range of networks and discusses methods for and approaches to plotting a social network graph onto a map, including the purpose-built R package *Spatial Social Media*. The book takes a non-mathematical approach to social networks and spatial statistics, suitable for postgraduate students in sociology, psychology, and the social sciences.

*An Introduction to the Ethics of Social Media* Douglas Campbell, 2025-09-23 Doug Campbell lays out a comprehensive and fair-minded account of both the benefits and the drawbacks of social media for our era. He attaches these evaluations to both the individual and to society as a whole. The case studies are compelling and exhibit a keen awareness of the current moment. How should we live now that many or even most of us are at least partially online? Campbell addresses this question from the point of view of privacy, attention, politics, misinformation, online ostracism, online friendship, and the potential benefits of simply quitting social media or at least some of its more pernicious platforms. Along the way, Campbell ties his discussions back to philosophical concerns raised by Plato, Aristotle, and Xunzi, among others. He also connects his discussion with recent work in feminist philosophy. And each chapter concludes with a succinct definition of key terms and suggested case studies and discussion topics that will engage students at all levels. An impressive accomplishment and one that deserves a place in the classroom.

*Loving Our Enemies Through Seasons of Bitterness* Lex Kohn, 2025-06-30 In a nation crumbling under the weight of bitterness, where government is the people's god, the way through is neither legislation nor activism, but loving the least loveable. A study of internet influence, conflict theory, and nineteenth-century wisdom reveals that people do not have to solve their disagreements if they can relearn how to love their enemies, as Christ commanded. This book highlights courageous men and women of faith from biblical times up through the present who obeyed this commandment, the Scriptures they followed, and how they managed it so that people today too might learn to substitute love instead of bitterness.
