Eclipse Rich Client Platform Jeff McAffer, Jean-Michel Lemieux, 2006 Written by the leaders of the Eclipse RCP project this is the first and ONLY book on Eclipse Rich Client Platform [Eclipse Rich Client Platform](#) Jeff McAffer, Jean-Michel Lemieux, Chris Aniszczyk, 2010-05-12 The Definitive Guide to Eclipse Rich Client Development In Eclipse Rich Client Platform Second Edition three Eclipse Rich Client Platform RCP project leaders show how to use Eclipse 3.5 Galileo to rapidly deliver cross platform applications with rich native feel GUIs The authors fully reveal the power of Eclipse as a desktop application development platform introduce important new improvements in Eclipse 3.5 and walk through developing a full featured branded RCP application for Windows Linux Mac and other platforms including handheld devices and kiosks Drawing on their extensive experience the authors cover building refining and refactoring prototypes customizing user interfaces adding help and software management features and building branding testing and shipping finished software They demonstrate current best practices for developing modular and dynamically extensible systems using third party code libraries packaging applications for diverse environments and much more For Java programmers at all levels of experience this book Introduces important new RCP features such as p2 Commands and Databinding Thoroughly covers key RCP related technologies such as Equinox SWT JFace and OSGi Shows how to effectively brand and customize RCP application look and feel Walks through user interface testing for RCP applications with SWTBot Illuminates key similarities and differences between RCP and conventional plug in development Hands on pragmatic and comprehensive this book offers all the real world nontrivial code examples working developers need as well as deep dives into key technical areas that are essential to your success

Cooperative Design, Visualization, and Engineering Yuhua Luo, 2012-08-18 This book constitutes the refereed proceedings of the 9th International Conference on Cooperative Design Visualization and Engineering CDVE 2012 held in Osaka Japan in September 2012 The 36 revised full papers presented were carefully reviewed and selected from numerous submissions The papers cover the topics of cooperative engineering basic theories methods and technologies that support CDVE cooperative design visualization and applications [Neuroimaging Workflow Design and Data-Mining](#) John Van Horn, 2012-04-01 With the increasing number of neuroimaging studies appearing yearly in the literature the need to consider the synthesis of the underlying data into new knowledge and research directions has never been more important The development of large scale databases and grid enabled computing has laid the groundwork for mining these rich datasets beyond the scope of their initial collection Additionally meta analyses of the summary results contained in published research articles have provided a powerful way to explore hidden trends in the neuroscience literature In each case the processing of data requires a careful consideration of the individual processing steps involved and how they can be assembled into reliable workflows In results from published studies the manner in which data were processed may influence meta analytic results which can have implications on clinical interpretation Several efforts now exist that provide tools for use in the construction

of data processing workflows However careful thought must be given to ensuring appropriate efficient optimal and replicable processing The results obtained from data mining and meta analysis must tell a story about a collection of existing data Also they must suggest novel and testable hypotheses for further investigation with implications for understanding of the brain in health and disease Where they do these new results and interpretations often provide fresh insights into the data that extend beyond the rationale for their original collection In this volume we have asked leaders in the field of neuroimaging data mining and meta analysis to provide their thoughts on methods for efficient workflow design interoperability with large scale databases and to discuss their work in exploring the richness of brain imaging data as well as the literature of published research results
