The Growth of Uncertainty After the End of the Cold War and Its Impact on the Security Environment of States Natalie

Züfle, 2011-10 Master's Thesis from the year 2009 in the subject Politics International Politics Topic Peace and Conflict Studies Security grade 2.1 Free University of Berlin Center for Global Politics course International Relations Online language English abstract Uncertainty has grown considerably after the end of the Cold War. In the place of one big threat a plenitude of many smaller and more incalculable risks superseded. New dangers have emerged or become more salient as compared to former times like environmental issues, IT problems or economic crises while old ones have not entirely vanished. The risks emanating from WMDs or the threat of wars remain existent albeit sometimes in an altered form. Several factors have contributed to the alteration of the threat and risk pattern: in the main the transition to a multipolar world order, the processes of globalization and last but not least the diminishing importance of borders and of the sovereign nation state as such are decisive. Hence the vulnerability of civil society has increased considerably as open societies are more risk prone. In reaction to these developments academics and politicians have refined the traditional concept of national security into a broader notion considering a multitude of aspects affecting the safety of the human being as such. In consequence the classical security architecture is being adapted bit by bit to the conditions of the 21st century. On each level, i.e. the national, regional as well as international layers, diverse mechanisms have been developed as exemplary illustrated with reference to the transnational danger of terrorism.

Hollywood's Cold War Tony Shaw, 2007 Published at a time when American filmmakers are deeply involved in the War on Terror, this authoritative and timely book offers the first comprehensive account of Hollywood's propaganda role during the defining ideological conflict of the 20th century, the Cold War.

Mao's China and the Cold War Jian Chen, 2010-03-15 This comprehensive study of China's Cold War experience reveals the crucial role Beijing played in shaping the orientation of the global Cold War and the confrontation between the United States and the Soviet Union. The success of China's Communist revolution in 1949 set the stage. Chen says: "The Korean War, the Taiwan Strait crises and the Vietnam War, all of which involved China as a central actor, represented the only major hot conflicts during the Cold War period, making East Asia the main battlefield of the Cold War while creating conditions to prevent the two superpowers from engaging in a direct military showdown. Beijing's split with Moscow and rapprochement with Washington fundamentally transformed the international balance of power, argues Chen, eventually leading to the end of the Cold War with the collapse of the Soviet Empire and the decline of international communism." Based on sources that include recently declassified Chinese documents, the book offers pathbreaking insights into the course and outcome of the Cold War.

The Cambridge History of the Cold War Melvyn P. Leffler, Odd Arne Westad, 2010-03-25 This volume examines the origins and early years of the Cold War in the first comprehensive historical reexamination of the period. A team
