*Building a Modern Financial System* David C. Cole,Betty F. Slade,1996 *Building A Modern Financial System* provides penetrating insights into the upheavals in Indonesia and explains the kinds of policies that can lead to the development of a modern financial system in a large relatively underdeveloped country The study covers all facets of the financial system emphasising the role of the monetary authorities the transition from government dominated to a predominantly private banking system and the rapid expansion of the capital market

Indonesia is a particularly interesting case because its economy and financial system was in shambles in the mid 1960s owing to political adventurism and economic mismanagement. Until more recently sensible economic policies and growth promoting reforms provided a sound financial system and a balanced expansion of agriculture and industry. However since the mid 1990s the stability of the Indonesian system has once again been called into question. **China's Centralized Industrial Order**

Chen Li, 2014-11-13. This book is about the political economy of China's industrial reform and the rise of a group of Chinese big businesses under the Communist Party and the central state's control. It examines the origins, evolution, and institutional configuration of this centralized system in governing the commanding heights of the Chinese industrial economy. Shaped by persistent industrial policies to develop China's national champions enterprises, the core parts of China's central industrial ministries and mono bank system have been transformed into a national team of giant modern business firms in industries such as oil, power generation, telecommunications, aerospace, aviation, nuclear, shipbuilding, mining, construction, automobile, and banking. Through an adaptive process of learning, experimentation, and restructuring, the bedrock of the authority relations and control mechanisms among the Party, government, bureaucracy, and firms has been consolidated rather than dismantled in the system's transformation. This alternative view of China's industrial reform presents a direct challenge to the neo-liberal transition model of China's institutional development and the mainstream Western conceptions of Chinese big business.
