Accelerated Learning A Users Guide:

Accelerated Learning Alistair Smith, Mark Lovatt, Derek Wise, 2005 Focuses on the learning in accelerated learning and provides the reader with over two hundred ideas and activities for putting theory into practice

An English as an Additional Language (EAL) Programme Caroline Scott, 2019-09-18 You enjoy teaching and like every other teacher you want the best for every learner Recently you have found a steady stream of learners coming to your school with little or no English You aren't really sure how to provide the best possible education for them when they are struggling to understand the English in your already differentiated lessons This book provides you with a programme for use as an induction to English complete with integral assessment It provides guidance on how to bridge the gap between these learners and their peers It is suitable for learners of any language background including those not literate in their home language due to the focus on learning through images It also includes suggestions on how to include parents who are new to English and ideas on family learning You'll find an EAL framework to provide structure to your EAL provision across the school as well as guidance on how to approach class teaching Developed from good practice in schools and informed by research this programme is designed to move learners into English quickly It uses a visual structured approach that works alongside immersion in the mainstream

Modelling and Control of Dynamic Systems Using Gaussian Process Models Juš Kocijan, 2015-11-21 This monograph opens up new horizons for engineers and researchers in academia and in industry dealing with or interested in new developments in the field of system identification and control It emphasizes guidelines for working solutions and practical advice for their implementation rather than the theoretical background of Gaussian process GP models The book demonstrates the potential of this recent development in probabilistic machine learning methods and gives the reader an intuitive understanding of the topic The current state of the art is treated along with possible future directions for research Systems control design relies on mathematical models and these may be developed from measurement data This process of system identification when based on GP models can play an integral part of control design in data based control and its description as such is an essential aspect of the text The background of GP regression is introduced first with system identification and incorporation of prior knowledge then leading into full blown control The book is illustrated by extensive use of examples line drawings and graphical presentation of computer simulation results and plant measurements The research results presented are applied in real life case studies drawn from successful applications including a gas liquid separator control urban traffic signal modelling and reconstruction and prediction of atmospheric ozone concentration A MATLAB toolbox for identification and simulation of dynamic GP models is provided for download
