**Radical Coherency** David Antin, 2012-03-15 We got to talking so David Antin begins the introduction to Radical Coherency embarking on the pursuit that has marked much of his breathless brilliantly conversational work For the past forty years whether spoken under the guise of performance artist or poet cultural explorer or literary critic Antin s innovative observations have helped us to better understand everything from Pop to Postmodernism Intimately wedded to the worlds of conceptual art and poetics Radical Coherency collects Antin s influential critical essays and spontaneous performed lectures or talk pieces for the very first time capturing one of the most distinctive perspectives in contemporary literature The essays presented here range from the first serious assessment of Andy Warhol published in a major art journal as well as Antin s provocative take on Clement Greenberg s theory of Modernism to frontline interventions in present debates on poetics and fugitive pieces from the 60s and 70s that still sparkle today and represent a gold mine for art historians of the period From John Cage to Allan Kaprow Mark Rothko to Ludwig Wittgenstein Antin takes the reader on an idiosyncratic personal journey through twentieth century culture with his trademark antiformalist panache one that will be welcomed by any fan of this consummate trailblazer

 and varied responses elicited by Russian born American painter Mark Rothko s 1903 1970 most compelling creations Rothko  
 was classified as an abstract expressionist although he himself rejected this label and even resisted classification as an  
 abstract painter Throughout his career Rothko was concerned with what other people experienced when they looked at his  
 canvases As his work shifted from figurative imagery to luminous fields of color his concern expanded to the setting in which  
 his paintings were exhibited In a series of analytic personal and even poetic essays by contemporary scholars Rothko s works  
 are analyzed This volume also reproduces a Scribble Book in which Rothko jotted down his ideas on teaching art to children

 I described a band of philosophers differing much from each other but all emanating from Sokrates as common intellectual  
 progenitor all manifesting themselves wholly or principally in the composition of dialogues and all living in an atmosphere of  
 Hellenic freedom as yet untroubled by any over ruling imperial ascendancy from without From that band among whom Plato  
 is facil princeps I now proceed to another among whom the like pre eminence belongs to Aristotle This second band knew the  
 Sokratic stimulus only as an historical tradition they gradually passed first from the Sokratic or Platonic dialogue dramatic  
 colloquial cross examining to the Aristotelian dialogue semi dramatic rhetorical counter expository and next to formal  
 theorizing ingenious solution and divination of special problems historical criticism and abundant collections of detailed facts  
 moreover they were witnesses of the extinction of freedom in Hellas and of the rise of the Macedonian kingdom out of  
 comparative nullity to the highest pinnacle of supremacy and mastership Under the successors of Alexander this extraneous  
 supremacy intermeddling and dictatorial not only overruled the political movements of the Greeks but also influenced  
 powerfully the position and working of their philosophers and would have become at once equally intermeddling even earlier  
 under Alexander himself had not his whole time and personal energy been absorbed by insatiable thirst for eastern conquest  
 ending with an untimely death Aristotle was born at Stageira an unimportant Hellenic colony in Thrace which has obtained a  
 lasting name in history from the fact of being his birthplace It was situated in the Strymonic Gulf a little north of the isthmus  
 which terminates in the mountainous promontory of Athos its founders were Greeks from the island of Andros reinforced  
 afterwards by additional immigrants from Chalkis in Euba It was like other Grecian cities autonomous a distinct self

governing community but it afterwards became incorporated in the confederacy of free cities under the presidency of Olynthus The most material feature in its condition at the period of Aristotles birth was that it lay near the frontier of Macedonia and not far even from Pella the residence of the Macedonian king Amyntas father of Philip Aristotle was born not earlier than 392 B C nor later than 385 384 B C His father Nikomachus was a citizen of Stageira distinguished as a physician author of some medical works and boasting of being descended from the heroic gens of the Asklepiads his mother Phaestis was also of good civic family descended from one of the first Chalkidian colonists 1Moreover Nikomachus was not merely learned in his art but was accepted as confidential physician and friend of Amyntas with whom he passed much of his time a circumstance of great moment to the future career of his son We are told that among the Asklepiads the habit of physical observation and even manual training in dissection were imparted traditionally from father to son from the earliest years thus serving as preparation for medical practice when there were no written treatises to study The mind of Aristotle may thus have acquired that appetite for physiological study which so many of his treatises indicate
