*Beyond Note Cards* Bruce P. Ballenger, 1999 Any teacher driven to despair by a stack of student research papers will find welcome inspiration in *Beyond Note Cards* Since the research paper first became a fixture in the composition classroom no other assignment has caused as much dread in students By putting it in historical context Ballenger offers new insight into the problems and promise of the research paper and practical advice on how to revive it *Beyond Note Cards* examines the best of the existing scholarship to offer a fresh theoretically sound approach to teaching the research paper Drawing on the recent movement to encourage inquiry based learning Ballenger argues that the spirit of inquiry should be at the heart of research paper instruction not the usual preoccupation with teaching the paper s formal qualities While Ballenger deals with theory his book is never dry Through case studies of his students and often revealing autobiographical anecdotes the author weaves a fascinating story about the evolution of the research paper historically and in his own classroom The book also contains many practical features including classroom tested exercises and assignments to help students become better researchers and research writers original survey information that instructors can use to discuss the assignment with their own students a special section on how to teach the double entry journal as part of a research assignment a helpful appendix that explores Internet research and new approaches to note taking *Beyond Note Cards* is an essential resource for instructors who are anxious to build connections between personal writing assignments and academic writing by highlighting the habits of mind that are present in both In addition teachers who already use Ballenger s popular student handbook *The Curious Researcher* Allyn Bacon will discover new ways to supplement it

**Plagiarism** Bill Marsh, 2012-02-01 Plagiarism takes an in depth look at the history of plagiarism in higher education in light of today s Web based plagiarism detection services Challenging the widespread assumption that plagiarism is a simple matter of student cheating or scriptural error Bill Marsh argues that today s teachers and educational institutions may be cheating themselves and their students in pursuing quick fix solutions to the so called epidemic of student plagiarism When students submit papers cribbed from materials found on the Web or purchase research papers from Internet paper mills these acts of sedition must also be recognized for better or worse as examples of new media composition techniques Examining Web based plagiarism detection services and software such as Glatt EVE Plagiarism Finder and Turnitin com Marsh contends that these services regulate writing and reading practices in ways consistent with precomputer even preindustrial efforts to manage and refine human behavior As he weaves together print history education rhetoric and communication theory Marsh shows that the rules governing plagiarism and the proper use of borrowed materials have their origins in early intellectual property law in the reading practices of twelfth century monks and the precepts of medieval alchemy Through an examination of these prescholastic models this book calls for a revised approach to academic writing in computer mediated environments

Writing with Authority David Foster, 2006 Writing with Authority Students Roles as Writers in Cross National Perspective offers a comparison of student writers in two university cultures one German and one American as the students learn to connect their writing to academic content David Foster demonstrates the effectiveness of using cross cultural comparisons to assess differences in literacy activities and suggests teaching approaches that will help American students better develop their roles as writers in knowledge based communities He proposes that American universities make stronger efforts to nurture the autonomy of American undergraduates as learner writers and to create apprenticeship experiences that more closely reflect the realities of working in the academic community This comparative analysis identifies crucial differences in the ways German and American students learn to become academic writers emphasizing two significant issues the importance of self directed long term planning and goal setting in developing knowledge based projects and the impact of time structures on students writing practices Foster suggests that students learn to write as knowledge makers using cumulative recursive task development as reflexive writing practices He argues for the full integration of extended self managed knowledge based writing tasks into the American undergraduate curriculum from the onset of college study A cross national perspective offers important insights into the conditions that influence novice writers Foster says including secondary preparations and transitions to postsecondary study Foster proposes that students be challenged to write transformatively to master new forms of authorship and authority based on self directed planning researching and writing in specific academic communities The text also addresses contested issues of power relations in students roles as academic writers and their perception of personal

authority and freedom as writers A course model incorporates significant self directed writing projects to help students build sustainable roles as transformative writers outlines change goals to help teachers develop curricular structures that support cumulative writing projects across the undergraduate curriculum and shows how teachers can develop self directed writing projects in a variety of program environments The Curious Reader Bruce Ballenger,Michelle Payne,2002-07 Motivating four level course for young learners that integrates reading grammar writing Bright Star Readers provide extensive reading graded by level and supported by illustrations Questions at the end of each book develop language skills *The Essentials of Academic Writing* Derek Soles,2005 Provides thorough coverage of the most important phases of academic writing from planning and research through revising and proofreading five carefully annotated academic essays by students and well known authors as models of narrative expository and argumentative writing and thirteen additional sample essays both student and professional and an engaging case study of a student research paper **English Journal** ,2004 Genre Theory, Narrative Theory, and Assumptions about Multigenre Writing Michelle Tremmel,2003 **Cumulated Index to the Books** ,1999 **Knowledge Incorporated** William Casey Marsh,2004 **The Subject is Reading** Wendy Bishop,2000 The Subject Is Reading is intended for first year writing courses in which students study reading writing and literature *You've Gotta Have Heart in Your Writing* James L.
