## **Beyond The Vision:**

**Beyond Vision** Allan Jones, 2018-06-06 In this unique and exhilarating autobiography Allan Jones Canada's first blind diplomat vividly describes how an untreatable eye disease slowly decimated his visual world most challengingly during his postings in Tokyo and New Delhi and how he discovered and took to heart the revelatory Indian philosophy that changed his life Advaita Vedanta the most iconoclastic and liberating of the classical Indian philosophies profoundly altered the author's experience of self and world He found that the true self as distinct from the individual ego far exceeds the boundaries of individuality It lies beneath sightedness or blindness and is absolutely unaffected by the latter This welcome shift of perspective was reinforced by startling discoveries in contemporary physics evolutionary biology and developmental psychology that are fully consistent with Advaitic metaphysics As for the practical applications of metaphysics this book demonstrates step by step how Advaitic insight and practice significantly reduce physical and psychological tension The most telling examples have to do with adjustments compelled by extreme circumstances Thus Jones describes how he drew upon Advaitic mindfulness techniques to maintain his white cane mobility skills in the teeth of permanent spinal nerve and muscle pain The arc of *Beyond Vision* moves from the claustrophobically personal to the openness of the transpersonal It begins in a dysfunctional family background breaking out into a full life encompassing an adventurous foreign service career spiritual exploration and an unconventional kind of marital love

*Beyond Vision* Casey O'Callaghan, 2017-01-19 *Beyond Vision* brings together eight essays by Casey O'Callaghan The works draw theoretical and philosophical lessons about perception the nature of its objects and sensory awareness through sustained attention to extra visual and multisensory forms of perception and perceptual consciousness O'Callaghan focuses on auditory perception perception of spoken language and multisensory perception The first essays concern the nature of audition's objects focusing on sounds especially drawing attention to the ways in which they contrast with vision's objects The middle essays explore forms of auditory perception that could not be explained without understanding audition's interactions with other senses This bridges work on sound perception with work on multisensory perception and it raises multisensory perception as an important topic for understanding perception even in a single modality The last essays are devoted to multisensory perception and perceptual consciousness They argue that no complete account of perception overall or of multisensory perceptual consciousness can be developed in modality specific terms perceiving amounts to more than just seeing hearing touching tasting and smelling at the same time The final essay presents a new framework for understanding what it is to be modality specific or to be multisensory
