## **Beyond Telepathy:**

**Beyond Telepathy** Andrija Puharich, 1973-12-15 Long unavailable in the U S this is one of the very best books available on the subject of psychical research a subject that has a much wider audience today than when the book was first published in 1962 Here Dr Puharich presents a coherent theory relating phenomena such as ESP astral projection meditative states and shamanism This is a stimulating attempt to relate psychical research to the physiology of mankind In the first part of the book Puharich brilliantly and lucidly presents the evidence for a nuclear psi entity or component called psi plasma which he maintains can exist independently of the physical body Conventional science has ignored this area of research because the phenomena is hard to reproduce in the lab on demand The latter part of *Beyond Telepathy* analyzes the biological physiological and psychological conditions leading to the control of Psi Plasma so that its activity can be demonstrated to order on demand This special revised edition includes a new introduction by Ira Einhorn co founder of Earth Day and an early web developer who worked with Jacques Vallee Jack Sarfatti and other scientists in setting up the Internet in its early days Andrija Puharich is a neurologist After completing his studies at the medical school of Northwestern University he set up his own laboratory in Maine for the study of extrasensory perception A stint with the U S Army at its chemical center aroused his interest in hallucination producing mushrooms leading to his first book *The Sacred Mushroom*

*Beyond Telepathy* Andrija Puharich, 2026-02-24 Details the author's scientific experiments with psychics on telepathic powers and psychic phenomena Explores how shamanism yoga and Indigenous spiritual traditions provide the means to consciously cultivate psychic abilities Analyzes the biological physiological and psychological conditions and stresses that lead to the development and control of telepathic and paranormal experiences Neurologist Andrija Puharich pioneered research in psi phenomena in the 1950s and 60s This classic edition of that research provides profound examples of telepathy clairvoyance and mind powers that he recorded in labs and clinical settings Puharich also draws on ancient spiritual practices to show how one might activate these abilities Connecting psychic phenomena to human physiology Puharich recounts experiments he conducted with psychics in which observable activation of the parasympathetic nervous system resulted in measurable improvements in telepathic reception He details his experiments on transmissive telepathy and how ESP and telepathy manifest in groups and he hypothesizes that the ability to transmit thoughts and information is connected to adrenalin and related compounds Puharich examines what he terms a mobile center of consciousness how the mind is separate from the body and how this center of consciousness can access psychic powers and nonlocal knowledge Beyond the lab Puharich explored how shamanism yoga and Indigenous spiritual traditions provide the biological and physical means to consciously cultivate psychic phenomena and ecstatic states that enable extraordinary abilities Bringing these psi phenomena ideas into contemporary context is a new introduction by Mitch Horowitz award winning author of numerous books and host of the podcast *Extraordinary Evidence* *ESP Is Real*

**The Paranormal Surrounds Us** Richard Reichbart, 2019-01-02

Shakespeare Tolstoy Joyce E M Forster and Ingmar Bergman all made the paranormal essential to their depiction of humanity Freud recognized telepathy as an everyday phenomenon Observations on parapsychological aspects of psychoanalysis also include the findings of the Mesmerists Jung Ferenczi and Eisenbud Many academicians attribute such psychic discoveries to poetic license rather than to accurate understanding of our parapsychological capacities The author a practicing psychoanalyst and parapsychologist and a lawyer familiar with Navajo culture argues for a fresh appraisal of psi phenomena and their integration into psychoanalytic theory and clinical work literary studies and anthropology
