Bureau of the Census,1980 **Programmers and Managers** P. Kraft,1977-07-18 Norbert Wiener perhaps better than anyone else understood the intimate and delicate relationship between control and communication that messages intended as commands do not necessarily differ from those intended simply as facts Wiener noted the paradox when the modem computer was hardly more than a laboratory curiosity Thirty years later the same paradox is at the heart of a severe identity crisis which con fronts computer programmers Are they primarily members of management acting as foremen whose task it is to ensure that orders emanating from executive suites are faithfully trans lated into comprehensible messages Or are they perhaps sim ply engineers preoccupied with the technical difficulties of relating software to hardware and vice versa Are they aware furthermore of the degree to which their work whether as manager or engineer routinizes the work of others and thereby helps shape the structure of social class relation ships I doubt that many of us who lived through the first heady and frantic years of software development at places like the RAND and System Development Corporations ever took time to think about such questions The science fiction like setting of mysterious machines blinking lights and torrents of numbers served to awe outsiders who could only marvel at the complexity of it all We were insiders who constituted a secret society into which only initiates were welcome So today I marvel at the boundless audacity of a rank out sider in writing a book like *Programmers and Managers* Logic and Structured Design for Computer Programmers Harold J. Rood,1992 This book is written as an introduction to the logic of data processing for those who have not begun to study programming and have little background in mathematics or logic The text addresses logical problems common to many programming languages and offers a variety of logic and design tools with

a variety of applications Students who complete a course based on this text should understand the logic of programming be able to specify the logic for moderately complex programs and be able to concentrate on the features of a particular language and then apply that language to implement program solutions
