## **Computer Solution Of Linear Programs:**

*Computer Solution of Linear Programs* John Lawrence Nazareth, 1987 This self contained book provides a systematic account of the main algorithms derived from the simplex method and the means by which they may be organized into effective procedures for solving practical linear programming problems on a computer The book begins by characterizing the problem and the method used to solve it going on to deal with the practicalities of the subject emphasizing concerns of implementation The final section of the book discusses the basic principles of optimization duality decomposition and homotopy In conjunction with the simplex method they each lead to other key algorithms of linear programming The author s approach is distinguished by his detailed exploration of ideas and issues that center on the need to structure data suitably and to organize calculations in an efficient and numerically stable manner Unlike many linear programming texts the author s overall perspective is grounded in nonlinear programming rather than combinatorics

**Linear Programming** Bruce R. Feiring, 1986-04 Linear Programming is a well written introduction to the techniques and applications of linear programming It clearly shows readers how to model solve and interpret appropriate linear programming problems Feiring has presented several carefully chosen examples which provide a foundation for mathematical modelling and demonstrate the wide scope of the techniques He subsequently develops an understanding of the Simplex Method and Sensitivity Analysis and includes a discussion of computer codes for linear programming This book should encourage the spread of linear programming techniques throughout the social sciences and since it has been developed from Feiring s own class notes it is ideal for students particularly those with a limited background in quantitative methods

**Computer Solution of Linear Programs** J. L. Nazareth, 1996 Linear Programming Leonard W. Swanson, 1980 *Multiple Criteria and Multiple Constraint Levels*

*Linear Programming* Shi Yong, Peng Yi, 2001 This book introduces multiple criteria and multiple constraint levels linear programming MC2LP which is an extension of linear programming LP and multiple criteria linear programming MCLP In the last decade the author and a group of researchers from the USA China Korea Germany and Hungary have been working on the theory and applications of MC2LP problems This volume integrates their main research results ranging from theoretical bases to broad areas of real world applications The theoretical bases include the formulation of MC2LP integer MC2LP and MC2 transportation model fuzzy MC2LP and fuzzy duality of MC2LP optimal system designs and contingency plans MC2 decision support system and MC2 computer software development The application areas are accounting management information systems production planning and telecommunications management The book serves as a seminar text for both undergraduates and graduates who have a linear algebra or equivalent background For practitioners it will help in handling LP type problems in multiple decision making environment
