*Combating Terrorism* United States. Congress. House. Committee on Government Reform. Subcommittee on National Security, Emerging Threats, and International Relations, 2003 *Combating Terrorism* William C. Banks, Renée de Nevers, Mitchel B. Wallerstein, 2008 Countering terrorism tops the list of America's devilish set of problems Americans deal with terrorism and the threat of terrorism through enhanced investigative tools in hopes of interdicting terrorism before it strikes as a law enforcement issue as a matter for international cooperation and diplomacy and as a species of war best fought by the military These approaches are not mutually exclusive nor are they exhaustive Nor have they or will they be successful all of the time But as a central focus of U S national security strategy the stakes couldn't be higher In ten comprehensive chapters *Combating Terrorism* discusses tools and tactics for dealing with this ever changing challenge with a focus on how they operate in the real world Additionally readers are encouraged to explore why terrorists might strike and what might be done to ameliorate root causes The authors also discuss the dynamics of homeland security planning and recovery with an examination of the crucial role of the media and our government's public affairs function in crisis situations Each chapter features a series of case studies designed to give students a quick study of actual terrorist actions and the counter strategies at work offering further insight into the complexities of combating terrorism

**Combating Terrorism** Robert H. Kupperman, 1986 *Combating Terrorism* , 2001 We at the U S General Accounting Office as all Americans were shocked by the coordinated terrorist attacks on New York City and Washington D C on September 11 2001 This report which already was scheduled for release this month before the events of September 11 summarizes federal efforts to combat terrorism prior to these events Given the tragic events of September 11 it is clear that combating terrorism efforts are now at the top of the national agenda This report does not include recent efforts made in light of these recent attacks While this report is a dispassionate and analytical discussion of the progress made and challenges faced by the federal government and the nation we recognize the terrible cost of terrorism in human terms The

events of September 11 remind us that the victims of terrorism are real people men women and children and are our families colleagues friends and neighbors Our hearts go out to the victims including the heroic first responders who were lost and their families We hope that this report promotes a reasoned discussion and additional actions designed to better prepare the nation to combat terrorism

*Combating Terrorism* Yonah Alexander, 2003-11-01 The tragic events of September 11 2001 and the consequent war on terrorism have made the question of effective counterterrorism policy a growing public concern The original essays in *Combating Terrorism* offer a unique overview and evaluation of the counterterrorism policies of ten countries the United States Argentina Peru Colombia the United Kingdom Spain Israel Turkey India and Japan Postscripts for each of the country chapters provide post September 11 assessments of current counterterrorism practices Most of the contributors to this volume have served in official governmental capacities and many continue to serve as consultants to governmental policy and decision makers All of the essays address the same set of questions to allow for cross national comparison of strategies and an assessment of counterterrorism practices What is the governmental and public perception of the sources of terrorism How successful have the policies of governments been in combating both domestic and international terrorism What factors influence a government's willingness and ability to cooperate with other countries in combating terrorism To what degree are the terrorist realities and the concerns of governments interconnected with global terrorism To what degree are certain countries natural hosts of either terrorist groups or propensities that target Western or closely allied interests To what degree are terrorist organizations mainly concerned about winning political participation in their target countries Which counterterrorism strategies work and which do not What are the lessons of past experiences for future counterterrorism responses at the national regional and global levels The conclusion to the volume summarizes the lessons that may be learned from the experiences of the ten countries and discusses a list of best practices in counterterrorism This book will be of interest to policymakers scholars and other individuals with professional responsibilities in the area of terrorism and security studies Written in clear accessible prose this book will also appeal to the general reader who is interested in gaining insight into the array of issues facing governments that endeavor to combat terrorism and into the possible solutions to one of the foremost threats to world peace in our time Yonah Alexander is Professor and Director Inter University Center for Terrorism Studies Senior Fellow and Director International Center for Terrorism Studies Potomac Institute for Policy Studies and Co Director Inter University Center for Legal Studies International Law Institute
