Almost Human:

Almost Human Lee R. Berger, John David Hawks, 2013 In 2013 Lee Berger caught wind of a cache of bones in a hard to reach underground cave in South Africa He put out a call around the world for petite collaborators men and women small and adventurous enough to be able to squeeze through 8 inch tunnels to reach a sunless cave 40 feet underground With this team of underground astronauts Berger made the discovery of a lifetime hundreds of prehistoric bones including entire skeletons of at least 15 individuals all perhaps two million years old Their features combined those of known prehomonids like Lucy the famous Australopithecus with those more human than anything ever before seen in prehistoric remains

Technology and Nursing Alan Barnard, Rozzano Locsin, 2007-06-01 Technology and Nursing Practice explains and critically engages with the practice implications of technology for nursing It takes a broad view of technology covering not only health informatics but also tele nursing and the use of equipment in clinical practice

Representations of the Post/human Elaine L. Graham, 2002 This work draws together a wide range of literature on contemporary technologies and their ethical implications It focuses on advances in medical reproductive genetic and information technologies

Secret UFO Files Rafal Col, 2013-11-28 Look up at the sky the universe is so big it is really hard not to think that there is no other intellegent life out there Are we alone An old question that I think we all know the answer to already But what do we know What does the government know and how much do they know Classified information revealed statements made by people who are risking their own safety for people to know How do they look Are they already here The statements in this book are all real and are facts Do you know everything

Imagining Slaves and Robots in Literature, Film, and Popular Culture Gregory Jerome Hampton, 2015-10-22 Imagining Slaves and Robots in Literature Film and Popular Culture Reinventing Yesterday s Slave with Tomorrow s Robot is an interdisciplinary study that seeks to investigate and speculate about the relationship between technology and human nature It is a timely and creative analysis of the ways in which we domesticate technology and the manner in which the history of slavery continues to be utilized in contemporary society This text interrogates how the domestic slaves of the past are being re imaged as domestic robots of the future Hampton asserts that the rhetoric used to persuade an entire nation to become dependent on the institution of chattel slavery will be employed to promote the enslavement of technology in the form of humanoid robots with Artificial Intelligence Imagining Slaves and Robots in Literature Film and Popular Culture makes the claim that science fiction film and popular culture have all been used to normalize the notion of robots in domestic spaces and relationships In examining the similarities of human slaves and mechanical or biomechanical robots this text seeks to gain a better understanding of how slaves are created and justified in the imaginations of a supposedly civilized nation And in doing so give pause to those who would disassociate America s past from its imminent future
