A New Juvenile Justice System Nancy E. Dowd, 2015-05-15 A New Juvenile Justice System aims at nothing less than a complete reform of the existing system not minor change or even significant overhaul but the replacement of the existing system with a different vision The authors in this volume academics activists researchers and those who serve in the existing system all respond in this collection to the question of what the system should be Uniformly they agree that an ideal system should be centered around the principle of child well being and the goal of helping kids to achieve productive lives as citizens and members of their communities Rather than the existing system with its punitive destructive undermining effect and uneven application by race and gender these authors envision a system responsive to the needs of youth as well as to the community s legitimate need for public safety How they ask can the ideals of equality freedom liberty and self determination transform the system How can we improve the odds that children who have been labeled as delinquent can make successful transitions to adulthood And how can we create a system that relies on proven family focused interventions and creates opportunities for positive youth development Drawing upon interdisciplinary work as well as on the ground programs and experience the authors sketch out the broad parameters of such a system Providing the principles goals and concrete means to achieve them this volume imagines using our resources wisely and well to invest in all children and their potential to contribute and thrive in our society

Translating and Transmediating Children's Literature Anna Kérchy, Björn Sundmark, 2020-09-30 From Struwwelpeter to Peter Rabbit from Alice to Bilbo this collection of essays shows how the classics of children s literature have been transformed across languages genres and diverse media forms This book argues that translation regularly involves transmediation the telling of a story across media and vice versa and that transmediation is a specific form of translation Beyond the classic examples the book also takes the reader on a worldwide tour and examines among other things the role of Soviet science fiction in North Korea the ethical uses of Lego Star Wars in a Brazilian context and the history of Latin translation in children s literature

Bringing together scholars from more than a dozen countries and language backgrounds these cross disciplinary essays focus on regularly overlooked transmediation practices and terminology such as book cover art trans sensory storytelling cart enfreakment foreignizing domestication and intra cultural transformation
