

COGNITIVE TOOLS

Cognitive tools are educational technologies that help students learn. They enable students to think more deeply about a topic or perform at a higher level than we would without them.

DEFINITION

Cognitive tools are “computational tools that can function as intellectual partners of the students, while they are engaged in discovery learning/constructivistic activities.” (Korres, 2019, p. 7) A cognitive tool does not do the thinking for students but provide strategies and guidance to help students to process information more efficiently.
