## **Children's Solution Work:**

**Children's Solution Work** Insoo Kim Berg, Therese Steiner, 2002-12-31 Therapists often despair when considering using Solution Focused Brief Therapy (SFBT) so successful with adults with children. Insoo Kim Berg and Therese Steiner show this despair to be unwarranted. These two master therapists lead readers through a series of conceptual and practical steps that elucidate just how the nonverbal, playful, and creative habits of children can support successful therapy based on the SFBT model. Children's Solution Work is necessary reading for anyone who associates with children and takes a concern for their development: clinicians, social workers, teachers, daycare workers, and parents. By focusing on and expanding the bases for engagement and communication between adult and child, Berg and Steiner provide adaptable tools for diagnosis, therapy, and negotiating differences at home. Full of examples and case studies, the Children's Solution Work demonstrates creative techniques and strategies for working with children without relying exclusively on language or conceptual thinking. The application of these techniques is discussed in various contexts and situations, including adapting them to suit cases of children with uncommon needs. Berg and Steiner also address questions typically raised by clinicians about the use of SFBT with children and consider the usefulness of this form of SFBT when working with adolescents.

system Spend many hours with CPS workers in the field learning from them and helping them make the shift from a deficit perspective to a collaborative model that emphasizes strengths and solutions Envision and implement change throughout the system Celebrate small successes on the way to building family self sufficiency and integrity This recipe for reforming child protective services is being followed in many public child welfare agencies with growing success In Building Solutions the authors explain how to conceptualize implement and sustain this hopeful and positive frame in a daily practice for dedicated frontline workers as well as for those in supervision management and administration The book has two parts In the first the authors put child protective services in context introducing the system and their new approach giving a brief history of child protection in the United States and setting the stage for change In the second part the authors walk readers through the nuts and bolts of implementation from the first phone call to case closure including discussions about placing a child out of the home Berg and Kelly also discuss supervision consultation and ongoing training as well as their vision of the future of CPS This book is not a manual it is a challenge to step out of the traditional CPS box and think differently to create client driven services that make sense The authors challenge CPS administrators supervisors and workers to begin conversations about how the system can be more helpful and respectful to the families so that the parents can get what they need to care for their children Building Solutions should have a place on the desk of everyone involved in child protective services
