## **Activities Reality And Symbol:**

**Activities** Gail S. Fidler, Beth P. Velde, 1999 This book describes the content and process for exploring and studying the social cultural and personal meanings inherent in activities Authored by Gail Fidler and Beth Velde this text examines the potential of activities to reflect and shape social cultural and personal meanings to communicate certain physical affective and cognitive responses *Activities Reality and Symbol* guides the reader to a better understanding of activities and their potential in our lives by examining the processes of investigating and discovering the dynamics of daily activities By looking at activities as never before this book successfully addresses activity for its own meaning symbol and purpose This book is organized as a sequential experiential learning process that includes structural assignments for interviews personal reflections and group discussion The beginning of the text presents an overview of the philosophy and the content focus of the book Following chapters explain the symbolic process as giving meaning to the events and activities of daily life and include an activity laboratory for experiencing symbol and metaphor A detailed examination of activities and a format for analyzing activities are explained Final chapters apply prior learning to specific activities including play games sport crafts careers and more

**Activity and Sign** Michael H.G. Hoffmann, 2005-03-04 The advancement of a scientific discipline depends not only on the big heroes of a discipline but also on a community's ability to reflect on what has been done in the past and what should be done in the future This volume combines perspectives on both It celebrates the merits of Michael Otte as one of the most important founding fathers of mathematics education by bringing together all the new and fascinating perspectives created through his career as a bridge builder in the field of interdisciplinary research and cooperation The perspectives elaborated here are for the greatest part motivated by the impressing variety of Otte's thoughts however the idea is not to look back but to find out where the research agenda might lead us in the future This volume provides new sources of knowledge based on Michael Otte's fundamental insight that understanding the problems of mathematics education how to teach how to learn how to communicate how to do and how to represent mathematics depends on means mainly philosophical and semiotic that have to be created first of all and to be reflected from the perspectives of a multitude of diverse disciplines
