Computers Helping People with Special Needs Joachim Klaus,Klaus Miesenberger,Dominique Burger,Wolfgang Zagler,2011-04-05 The introduction to the 1st International Conference on Computers for Handicapped Persons Vienna 1989 byAMinTjoa UniversityofVienna andRoland Wagner UniversityofLinz

nishedwiththefollowingmissionstatementonthe Future Direction on Computers for Handicapped Persons The different themes

show that a lot of problems are solved by the usage of computer technology for helping handicapped persons for instance for the blind and visually handicapped A consequence of the discussed themes there are two directions which should be done in the next years One direction is obvious The tools must be improved and research and development work should be extended to all groups of handicapped even if they are numerically not so large as for instance the blind or visually handicapped persons On the other side in the area of social implications there is an increasing demand on social science studies on overall computer use among disabled persons Because sources are in principle missing today about disabled persons work tasks research in this field must begin by trying to survey this aspect Particular attention should be paid to the extent and character of computer use among the handicapped in work life There are a lot of questions which should be answered during the next years for reaching the aim of rehabilitation Fifteen years later the 9th International Conference on Computers Helping People with Special Needs Paris 2004 offered a comprehensive and deepened view on general awareness special research and individual applications concerning disabled people and their participation in our society *Computers Helping People with Special Needs* Klaus Miesenberger, Joachim Klaus, Wolfgang Zagler, 2003-08-02 Success and efficiency are the latest standards and scales of our society Virtual surroundings and communication rooms electronic portals and platforms are pushing us into a new world of personal and professional interaction and cooperation The network to subdue violence is fragile and crumbling tradition is no longer a power of our community What of leisure time dreams and fantasy What of education in the family at school and at university Travelling round the world to develop yourself how man becomes man pleading for a new determination of the idea of education a mission of past centuries inadequate nowadays Regarding September 11th last year the conflicts and confrontations round the globe and events in our direct surroundings these questions seem to be a cry at least to reflect upon what is happening around us and where we all of us still play an active role An International Conference on Computers Helping People with Special Needs is like an island is this a topic at all these days is it worth discussing the area of ICT and the situation of people with disabilities persons who are segregated from developing their personal and professional careers Indeed the biennial meeting has never included these actualities but the basic idea behind ICCHP starting in 1989 was to focus on these fringe groups and to offer a platform of exchange on all aspects of Human Computer Interaction and the usage of ICT for people with special needs *Principles and Practice of Ophthalmology E-Book* Daniel M.
