## **Arguing Constructively:**

**Arguing Constructively** Dominic A. Infante, 1987-12-01 A refreshing fusion of interpersonal human relations and argumentation This clear and engaging volume is unique because of its dual focus On the one hand the purpose is to instruct on the methods of argumentation theory This represents a set of principles methods and strategies of argument that have evolved from the time of Ancient Greece On the other hand the intent is to teach human relations in argumentative situations specifically how to manage interpersonal relations during arguments Books on argumentation and debate have tended to say little about how arguing can affect the relationship one has with an adversary How do you prevent harm to a valued friendship for instance Moreover books on interpersonal communication have had little to say about arguing Instead the emphasis is on achieving satisfying relations with others The author shows that recent research makes it clear that argumentation and interpersonal communication are complementary areas of communication Arguing constructively in informal interpersonal and small group contexts is a skill that can bring about good outcomes Instruction on building and maintaining satisfying relations with other people is lacking if it does not deal with how to do this while arguing especially since argumentative communication probably will occur throughout a relationship This book has been written to correct what has been perhaps too narrow a focus in the areas of argumentation and interpersonal communication

**Making Great Strategy** Glenn R. Carroll, Jesper B. Sørensen, 2021-01-26 Making strategy requires undertaking major often irreversible decisions aimed at long term success in an uncertain future All leaders must formulate a clear course of action yet many lack confidence in their ability to think systematically about their strategy They struggle to apply the abstract lessons offered by conventional approaches to strategic analysis to their unique contexts Making Great Strategy resolves these challenges with a straightforward readily applicable framework Jesper B S rensen and Glenn R Carroll show that one factor underlies all sustainably successful strategies a logically coherent argument that connects resources capabilities and environmental conditions to desired outcomes They introduce a system for formulating and managing strategy through a set of three core activities visualization formalization and logic and constructive argumentation These activities can be implemented in any organization and are illustrated through examples and case studies from well known companies such as Apple Walmart and The Economist This book shows that while great strategic thinking is hard it is not a mystery Widely applicable and relevant for managers and leaders at all levels especially executive teams charged with setting the course of their organizations it is essential reading for anyone faced with practical problems of strategic management
