Inmon,1992 *AS/400 Architecture and Application* Jill T. Lawrence,1993 Lawrence a former IBM product manager for intermediate systems combines an insider s knowledge and an outsider s perspective to tell you exactly what the AS 400 is what it does and how it does it This is the best guide available for anyone considering downsizing or distributed computing and for AS 400 users who want to know more about what their AS 400 can do for them VSE JCL and Subroutines for Application Programmers Leo J. Langevin,1992 This report describes the results of a survey of 1 000 multinational corporations undertaken in 1992 which asked about the importance of environmental issues in investment decisions The survey shows that most large corporations look systematically at environmental questions when they decide where to invest Environmental problems appear to have discouraged a number of investments across different industries and the question of liability for past pollution problems at industrial sites was the greatest concern for investors

IBM CICS and the JVM server: Developing and Deploying Java Applications Chris Rayns,George Bogner,Tony Fitzgerald,Elisabetta Flamini,Jun Hua Gao,Ivan D Hargreaves,Phil Wakelin,Hongtao Wen,Bei Chun Zhou,IBM Redbooks,2013-07-15 This IBM Redbooks publication provides information about the new Java virtual machine JVM server technology in IBM CICS Transaction Server for z OS V4 2 We begin by outlining the many advantages of its multi threaded operation over the pooled JVM function of earlier releases The Open Services Gateway initiative OSGi is described and we highlight the benefits OSGi brings to both development and deployment Details are then provided about how to configure and use the new JVM server environment Examples are included of the deployment process which takes a Java application from the workstation Eclipse integrated development environment IDE with the IBM CICS Explorer software development kit SDK plug in through the various stages up to execution in a stand alone CICS region and an IBM CICSplex environment The book continues with a comparison between traditional CICS programming and CICS programming from Java As a result the main functional areas of the Java class library for CICS JCICS application programming interface API are extensively reviewed Further chapters are provided to demonstrate interaction with structured data such as copybooks and how to access relational databases by using Java Database Connectivity JDBC and Structured Query Language for Java SQLJ Finally we devote a chapter to the migration of applications from the pooled JVM model to the new JVM server run time

ARCHIVED: Pooled JVM in CICS Transaction Server V3 Chris Rayns,George Burgess,Scott Clee,Tom Grieve,John Taylor,Yun Peng Ge,Guo Qiang Li,Qian Zhang,Derek Wen,IBM Redbooks,2015-06-17 NOTE This book contains information

about technologies that have been superseded and it is retained for historical purposes only IBM CICS Transaction Server CICS TS has supported the deployment of Java applications since the 1990 s In CICS TS V1 3 1999 IBM introduced the Pooled JVM style of JVM infrastructure within CICS TS This infrastructure was designed to be similar in nature to that which a CICS application developer for a language such as COBOL would be used to It brought the benefits of the new Java language to CICS TS without a dramatic change to the way CICS users thought of core concepts such as re entrancy and isolation As enterprise usage of Java evolved it began to make more and more use of multi threaded environments where isolation was not a desired characteristic Additionally technologies such as OSGi Open Service Gateway Initiative evolved to overcome some of the original disadvantages of applying Java to an enterprise environment As such the limitations of the Pooled JVM approach began to outweigh the benefits In CICS TS V4 1 2009 IBM introduced the new JVM server infrastructure in CICS TS as a replacement to the Pooled JVM approach This JVM server infrastructure provides a much more standard Java environment that makes the writing and porting of Java applications for CICS TS much simpler In CICS TS V5 1 2012 support for the old Pooled JVM infrastructure was removed While there is a relatively simple migration path from Pooled JVM to JVM server applications should no longer be written to the Pooled JVM infrastructure There are a number of more recent IBM Redbooks publications covering the replacement JVM server technology including IBM CICS and the JVM server *Developing and Deploying Java Applications SG24 8038 A Software Architect s guide to New Java Workloads in IBM CICS Transaction Server SG24 8225* [CMG '91 Proceedings](#) ,1991 **CICS/VS** Eugene S.
