Atlas of Entomopathogenic Fungi Robert A. Samson, Harry C. Evans, Jean-Paul Latge, 2013-03-09 Biological insecticides are competing more and more with traditional chemical pesticides A successful application of natural pathogens requires a better understanding of both fungal and insect ecology and physiology This Atlas provides a comprehensive overview of these fields and includes the taxonomy of those species of fungi which are proven pathogens Biotechnological methods for the genetic modification of these natural pathogens resulting in further optimization and the advantages of biological control are discussed

The Ecology of Fungal Entomopathogens Helen E. Roy, Fernando E. Vega, Mark S. Goettel, Dave Chandler, Judith K. Pell, Eric Wajnberg, 2010-02-04 Understanding of the ecology of fungal entomopathogens has vastly increased since the early 1800 s but remains challenging The often complex interactions between pathogen and host are being unravelled through eloquent research and the importance of the often subtle interactions in determining the success or failure of biological control cannot be underplayed The realm of ecology is vast and deciphering insect fungal pathogen interactions within an ecological context will take us on voyages beyond our imagination This book brings together the work of renowned scientists to provide a synthesis of recent research on the ecology of fungal entomopathogens exploring host pathogen dynamics from the context of biological control and beyond Dr Helen Roy leads zoological research in the Biological Records Centre at the NERC Centre for Ecology this continues to be a source of fascination She has been an associate editor of BioControl since 2006 Dr Dave Chandler is an insect pathologist at the University of Warwick UK He has studied entomopathogenic fungi for just over 20 years He has particular interests in entomopathogenic fungi as biocontrol agents of horticultural crops fungal physiology and ecology and the pathogens of honeybees Dr Mark Goettel is an insect pathologist at the Lethbridge Research Centre of Agriculture the relationships between guild diversity habitat diversity and ecosystem function pathogen induced host behavioural change Dr Eric Wajnberg is a population biologist specialising in behavioural ecology statistical modelling and population genetics He is also an expert in biological control with more than 20 years experience of working with insect parasitoids He has been the Editor in Chief of BioControl since 2006 Dr Fernando E Vega is an entomologist with the United States Department of Agriculture Agricultural Research Service in Beltsville Maryland USA He conducts research on biological methods to control the coffee berry borer the most important insect pest of coffee throughout the world He is co editor with Meredith Blackwell of *Insect Fungal Associations Ecology and Evolution* published by Oxford University Press in 2005 and serves as an Editorial Board Member for *Fungal Ecology*
