## **Chain Of Evidence:**

*Principles of Evidence in International Criminal Justice* Karim A. A. Khan, Caroline Buisman, Christopher Gosnell, 2010  
Principles of Evidence in International Criminal Justice provides an overview of the procedure and practice concerning the admission and evaluation of evidence before the international criminal tribunals. The book is both descriptive and critical and its emphasis is on day to day practice drawing on the experience of the Yugoslavia Rwanda and Sierra Leone Tribunals. This book is an attempt to define and explain the core principles and rules that have developed at those ad hoc Tribunals, the rationale and origin of those rules and to assess the suitability of those rules in the particular context of the International Criminal Court which is still at its early stages. The ICC differs in structure from the ad hoc Tribunals and approaches the legal issues it has to resolve differently from its predecessors. The ICC is however confronted with many of the same questions. The book examines the differences between the ad hoc Tribunals and the ICC and seeks to offer insights as to how and in which circumstances the principles established over years of practice at the ICTY, ICTR and SCSL may serve as guidance to the ICC practitioners of today and the future. The contributors represent a cross section of the practising international criminal bar drawn from the ranks of the Bench, the Prosecution and the Defence and bringing with them different legal domestic cultures. Their mixed background underlines the recurring theme in this book which is the manner in which a legal culture has gradually taken shape in the international Tribunals drawing on the various traditions and experiences of its participants.

Intelligence Analysis as Discovery of Evidence, Hypotheses, and Arguments Gheorghe Tecuci, David A. Schum, Dorin Marcu, Mihai Boicu, 2016-08-30  
This unique book on intelligence analysis covers several vital but often overlooked topics. It teaches the evidential and inferential issues involved in connecting the dots to draw defensible and persuasive conclusions from masses of evidence. From observations we make or questions we ask we generate alternative hypotheses as explanations or answers we make use of our hypotheses to generate new lines of inquiry and discover new evidence and we test the hypotheses with the discovered evidence. To facilitate understanding of these issues and enable the performance of complex analyses the book introduces an intelligent analytical tool called Disciple CD. Readers will practice with Disciple CD and learn how to formulate hypotheses, develop arguments that reduce complex hypotheses to simpler ones, collect evidence to evaluate the simplest hypotheses and assess the relevance and the believability of evidence which combine in complex ways to determine its inferential force and the probabilities of the hypotheses.
