Changing Work Relationships in Industrialized Economies Isik U. Zeytinoglu, 1999-01-01 This book examines changing work relationships in industrialized economies within the context of economic restructuring and demographic variables The goal of this book is to examine experiences of industrialized economies in dealing with changing work relationships and discuss policy implications of creating such work relationships The thesis of the book is that non standard employment forms in restructuring economies affected all workers but particularly females and the youth Other demographic variables of education level race ethnicity immigrant status ability and economic class were also underlying forces in the construction and arrangements of non standard work Research shows both positive and negative effects of changing work relationships on workers though there is no conclusive result whether one or the other affect is stronger The discussion in this book pays attention to this debate and sheds light on it This book differs from others in its comprehensiveness of the coverage of work relationships referring to part time temporary casual telework and self employment without employees in its examination of a variety of variables including gender age race ethnicity immigrant status ability education level and economic class in the analysis of the topic in relation with the economic restructuring and in its initiative in collaboration of researchers from a variety of backgrounds and regions of the world that have expertise on changing work relationships

Changing Work Relationships in Industrialized Economies Isik Urla Zeytinoglu, 1999-11-15 This book examines changing work relationships in industrialized economies within the context of economic restructuring and demographic variables The goal of this book is to examine experiences of industrialized economies in dealing with changing work relationships and discuss policy implications of creating such work relationships The thesis of the book is that non standard employment forms in restructuring economies affected all workers but particularly females and the youth Other demographic variables of education level race ethnicity immigrant status ability and economic class were also underlying forces in the construction and arrangements of non standard work Research shows both positive and negative effects of changing work relationships on workers though there is no conclusive result whether one or

the other affect is stronger The discussion in this book pays attention to this debate and sheds light on it This book differs from others in its comprehensiveness of the coverage of work relationships referring to part time temporary casual telework and self employment without employees in its examination of a variety of variables including gender age race ethnicity immigrant status ability education level and economic class in the analysis of the topic in relation with the economic restructuring and in its initiative in collaboration of researchers from a variety of backgrounds and regions of the world that have expertise on changing work relationships

Strategy, Organization and the Changing Nature of Work Jordi Gual i Sole, Joan E. Ricart i Costa, 2001-01-01 The book offers a full and wide ranging analysis of the nature and extent of the organisational changes and of the role played by employability in the new production contexts Its strengths lie basically in its multidisciplinary approach which enables the phenomenon of organisational change to be observed from different angles and in its commitment to a balance between the pursuit of theory and its empirical underpinnings In summary this is a well grounded and argued work both theoretically and empirically and will be of interest to anyone wishing to understand the complex nature of organisational change and especially to those who even though organisational change may not be their central object of study or concern nonetheless seek to understand the rich and complex debate concerning processes of organisational transformation as a necessary starting point for the analysis of the broader process of transformation of a model of society Amparo Serrano Pascual Transfer I do not mean to propose any prescriptions for the problem of employment in our time I leave that to the many fine specialists in the field who have contributed to this book I find this an excellent and thought provoking volume that I hope will shed light on a theme of vital significance for people everywhere For it is in work that people find happiness and fulfilment and meaning From the preface by Carlos Cavall University of Navarra Barcelona Spain New technologies global markets and increased competitive pressures mean that companies are having to reinvent themselves reappraise their competitive strategies and rethink the ways in which they organize business activities This timely book illustrates how changes in strategy can translate into organizational changes within the firm itself and can influence the relationship between the firm and their employees and collaborators The authors provide a broad theoretical and empirical assessment of these complex changes their effect on the nature of employment and the consequences for both employers and employees They develop a framework that encompasses the interaction between the strategic reactions of businesses to a changing environment and the restrictions imposed by social institutions A key theme of the book is that we are now living in an age of transition where concepts such as job security which have played a crucial role in society are no longer valid Indeed the importance of the research presented in the book is underlined by the social and political implications such changes will undoubtedly bring Significantly the authors view the subject matter from an interdisciplinary perspective applying tools from the fields of organizational behavior sociology and psychology
