Leibowitz, 2013-06-29 ELIA M LEIBOWITZ Director Wise Observatory Chair Scientific Organizing Committee The international symposium on Astronomical Time Series was held at the Tel Aviv University campus in Tel Aviv from December 30 1996 to January 11 1997 It was organized in order to celebrate the 25th anniversary of the Florence and George Wise Observatory WO operated by Tel Aviv University The site of the 1 meter telescope of the observatory is near the town of Mitzpe Ramon some 220 km south of Tel Aviv at the center of the Israeli Negev highland There were two major reasons for the choice of Time Series as the subject matter for our symposium One is mainly concerned with the subject matter itself and one is related particularly to the Wise Observatory There is hardly any doubt that astronomical time series are among the most ancient concepts in human civilization and culture One can even say that astronomical time series preceeded astronomy itself as the impression of the day night cycle on Earth is probably the first and most fundamental effect that impress a human being or in fact most living creatures on this planet An echo of this idea

can be heard in the Biblical story of Creation where the concept of night and day precedes the creation of the astronomical objects
