RIMS. United States. Selective Service System, 1984 *Introduction to Audiovisual Archives* Peter

Stockinger, 2013-02-07 Today audiovisual archives and libraries have become very popular especially in the field of collecting preserving and transmitting cultural heritage However the data from these archives or libraries videos images sound tracks etc constitute as such only potential cognitive resources for a given public or target community They have to undergo more or less significant qualitative transformations in order to become user or community relevant intellectual goods These qualitative transformations are performed through a series of concrete operations such as audiovisual text segmentation content description and indexing pragmatic profiling translation etc These and other operations constitute what we call the semiotic turn in dealing with digital audiovisual texts corpora of texts or even entire audiovisual archives and libraries They demonstrate practically and theoretically the well known from data to meta data or from simple information to relevant knowledge problem a problem that obviously directly influences the effective use the social impact and relevancy and therefore also the future of digital knowledge archives It constitutes indeed the heart of a diversity of important R D programs and projects all over the world

Water in Confining Geometries V. Buch, J.P. Devlin, 2013-03-09 The evolution of the physical chemical sciences towards understanding the behavior of matter at the molecular level has been accompanied by a rapid increase in studies of the properties and functioning of confined water that is water in small clusters and nanoparticles or confined to solid liquid thin films surfaces and interfaces These studies represent a convergence of interests and methodologies That is much emerging science both basic and applied depends on an understanding of confined water for significant advances and the technical ability to gain that understanding has evolved only during the past decade or two Firm concepts of the behavior of water in a variety of confining geometries are basic to advances in molecular biology weather phenomena atmospheric chemistry interstellar and interplanetary physics and chemistry as well as to the complete understanding of properties of macroscopic amounts of water and water solute systems In recognition of the growing importance of studies of confined water a Telluride Colorado workshop was convened in August of 2000 This was an exceptionally strong 5 day conference with numerous informative talks by leading scientists on both basic and applied aspects of the subject Lively discussions left the participants spent

Vibration Acoustics Applied To Vver-1200 Reactor Plant Gennadiy V Arkadov, Vladimir I Pavelko, Mikhail T Slepov, 2021-05-05 The safe operation of a nuclear power plant depends on the reliability and safety of the reactor plant which in turn requires careful monitoring of the equipment at the manufacturing and operation stages This monograph critically examines the fundamental effects of hydrodynamic and vibration load formation on the modern power unit of the VVER 1200 nuclear power plant which is originally designed in Russia as well as the causes and main sources of vibration in the main circulation loop and their energy contribution Practical examples are used to explain how vibration stress can be reduced and the hydrodynamic status of the circuit
