**The Routledge Research Companion to Heritage and Identity** Peter Howard,2016-03-16 Heritage represents the meanings and representations conveyed in the present day upon artifacts landscapes mythologies memories and traditions from the past It is a key element in the shaping of identities particularly in the context of increasingly multicultural societies This Research Companion brings together an international team of authors to discuss the concepts ideas and practices that inform the entwining of heritage and identity They have assembled a wide geographical range of examples and interpret them through a number of disciplinary lenses that include geography history museum and heritage studies archaeology art history history anthropology and media studies This outstanding companion offers scholars and graduate students a thoroughly up to date guide to current thinking and a comprehensive reference to this growing field

**Heritage from Below** Iain J.M. Robertson,2016-04-22 Research into the ways in which the past is constructed and consumed in the present is now reaching a mature stage This maturity derives from the general acceptance that heritage as a social and cultural construct is closely connected to the making and maintaining of identity at all spatial scales This unique book contributes to the developing discourse by focusing on heritage from below in a field where the literature on the relationship between heritage and identity has rightly been focused on national identity Never before have the contemporary manifestations and the theoretical structuring framework of the idea of heritage from below been discussed in the depth offered by this book The authors first establish the concept and then engage with the actual practice and practitioners of heritage from below in the UK Europe Australia and North America
