Magma-Rock and Magma-Mush Interactions as Fundamental Processes of Magmatic Differentiation Anastassia Borisova, Wendy A. Bohrson, Frank John Spera, 2024-08-08 During transport a percolating melt or magma may contact rock or a magmatic mush resulting in inevitable interactions that may be described as magma melt rock or magma melt mush interactions Examples of these types of interactions include mantle metasomatism mineral melt reaction in the mantle mineral dissolution in magma crustal wallrock partial melting and thermal remobilization of preexisting mushy magma rejuvenation of mush by intruding high specific enthalpy magma This spectrum of processes plays a major role in the composition thickness and age of the mantle lithosphere and its associated crust These interactions also impact the asthenosphere because melts that form in the deepest parts of the mantle may ascend and interact with shallower mantle during transport **Trauma** William C.
