Dog Control and Welfare Great Britain: Parliament: House of Commons: Environment, Food and Rural Affairs Committee,2013-02-15 DEFRA s belated proposals to tackle irresponsible dog ownership are too limited Since 2007 dogs have killed seven people including five children in private homes The NHS also spends over 3 million annually treating dog attack injuries Some eight assistance dogs a month and thousands of livestock annually are attacked by dogs The Home Office approach to tackling antisocial behaviour is too simplistic and fails to reflect the impact that poor breeding and training by irresponsible owners can have on a dog s behaviour New rules should give enforcement officers more effective powers including Dog Control Notices to prevent dog related antisocial behaviour Local authorities need to devote more resources to the effective management of stray dogs MPs call for changes in the legislation to give powers to extend the banned list to include other dogs with particularly aggressive characteristics At the same time those tasked to enforce legislation should have the discretion to neuter rather than destroy a banned animal where a particular dog poses no threat The Advisory Council on Welfare Issues of Dog Breeding should be given a formal regulatory role to enforce standards Any breeder producing more than two litters per year should be licensed and subject to welfare checks The Kennel Club should stop registering puppies from breeders not compliant with its own Assured Breeder Scheme It should also commission an independent annual review of Breed Standards led by vets to eliminate health problems linked to breeding for exaggerated characteristics Lastly MPs call on websites advertising pets to

develop a voluntary Code of Practice **Free-Ranging Dogs and Wildlife Conservation** Matthew E. Gompper,2013-10-17
Dogs are the world's most common and widespread carnivores and are nearly ubiquitous across the globe. The vast majority of these dogs, whether owned or unowned, pure bred or stray, spend a large portion of their life as unconfined, free-roaming animals persisting at the interface of human and wildlife communities. Their numbers are particularly large throughout the developing world where veterinary care and population control are often minimal and human populations are burgeoning. This volume brings together the world's experts to provide a comprehensive, unifying and accessible review of the effects of dogs on native wildlife species. With an emphasis on addressing how free-ranging dogs may influence wildlife management and native species of conservation concern, chapters address themes such as the global history and size of dog populations, dogs as predators, competitors and prey of wildlife, the use of dogs as hunting companions, the role of dogs in maintaining diseases of wildlife and the potential for dogs to hybridize with wild canid species. In addition, the potential role of dogs as mediators of conservation conflict is assessed, including the role of dogs as livestock guardians, the potential for dogs to aid researchers in locating rare wildlife species of conservation interest and the importance of recognizing that some populations of dogs, such as dingoes, have a long history of genetic isolation and are themselves important conservation concerns. A common theme woven throughout this volume is the potential for dogs to mediate how humans interact with wildlife and the recognition that the success of wildlife conservation and management efforts are often underpinned by understanding and addressing the potential roles of free-ranging dogs in diverse natural ecosystems. *Free Ranging Dogs and Wildlife Conservation* is aimed at professional wildlife and conservation ecologists, managers, graduate students and researchers with an interest in human-dog-wildlife interactions. It will also be of relevance and use to dog welfare researchers, veterinary scientists, disease ecologists and readers with an interest in the interface of domestic animals and wildlife. The information is supported by references from the author's published work and his wealth of clinical experience to form the important authoritative text in this field. A vital aid to those seeking an understanding of normal and abnormal reproduction as well as common reproductive techniques. **Dogs, Past and Present** Ivana Fiore,Francesca Lugli,2023-09-07 This volume gathers contributions from scholars from a variety of disciplines to provide a comprehensive assessment of the importance of dogs through history. There is a focus on the necessity of an interdisciplinary perspective to fully understand the fundamental role that dogs have played in our past. **All about Dogs** Henri Vibert,1921 *The Joy of Breeding Your Own Show Dog* Ann Seranne,2004-12-03 Back by popular demand, the only breeding book endorsed by top breeders.
