## **Avoiding Armageddon:**

*Avoiding Armageddon* Bruce Riedel, 2013-01-29 India and Pakistan will be among the most important countries in the twenty first century In *Avoiding Armageddon* Bruce Riedel clearly explains the challenge and the importance of successfully managing America s affairs with these two emerging powers and their toxic relationship Born from the British Raj the two nations share a common heritage but they are different in many important ways India is already the world s largest democracy and will soon become the planet s most populous nation Pakistan soon to be the fifth most populous country has a troubled history of military coups dictators and harboring terrorists such as Osama bin Laden The longtime rivals are nuclear powers with tested weapons They have fought four wars with each other and have gone to the brink of war several times Meanwhile U S presidents since Franklin Roosevelt have been increasingly involved in the region s affairs In the past two decades alone the White House has intervened several times to prevent nuclear confrontation on the subcontinent South Asia clearly is critical to American national security and the volatile relationship between India and Pakistan is the crucial factor determining whether the region can ever be safe and stable Based on extensive research and Riedel s role in advising four U S presidents on the region *Avoiding Armageddon* reviews the history of American diplomacy in South Asia the crises that have flared in recent years and the prospects for future crisis Riedel provides an in depth look at the Mumbai terrorist attack in 2008 the worst terrorist outrage since 9 11 and he concludes with authoritative analysis on what the future is likely to hold for America and the South Asia puzzle as well as recommendations on how Washington should proceed

*Hubris, Self-Interest, and America's Failed War in Afghanistan* Thomas P. Cavanna, 2015-07-22 This book describes the conduct of the US led post 9 11 war in Afghanistan Adopting a long term perspective it argues that even though Washington initially had an opportunity to achieve its security goals and give Afghanistan a chance to enter a new era it compromised any possibility of success from the very moment it let bin Laden escape to Pakistan in December 2001 and found itself locked in a strategic overreach Given the bureaucratic and rhetorical momentum triggered by the war on terror in America the Bush Administration was bound to deploy more resources in Afghanistan sooner or later despite its focus on Iraq The need to satisfy unfulfilled counter terrorism objectives made the US dependent on Afghanistan s warlords which compromised the country s stability and tarnished its new political system The extension of the US military presence made Washington lose its

leverage on the Pakistan army leaders who aware of America's logistical dependency on Islamabad supported the Afghan insurgents their historical proxies more and more openly The extension of the war also contributed to radicalize segments of the Afghan and Pakistani populations destabilizing the area further In the meantime the need to justify the extension of its military presence influenced the US led coalition into proclaiming its determination to democratize and reconstruct Afghanistan While highly opportunistic the emergence of these policies proved both self defeating and unsustainable due to an inescapable collision between the US led coalition's inherent self interest hubris limited knowledge limited attention span and limited resources and on the other hand Afghanistan's inherent complexity As the critical contradictions at the very heart of the campaign increased with the extension of the latter's duration scale and cost America's leaders entrapped in path dependence lost their strategic flexibility Despite debates on troops resource allocation and more sophisticated doctrines they repeated the same structural mistakes over and over again The strategic overreach became self sustaining until its costs became intolerable leading to a drawdown which has more to do with a pervasive sense of failure than with the accomplishment of any noble purpose or strategic breakthrough

*Avoiding Armageddon - Preserving Our Culture* Jerry Betts, 2005 Rule of law individual rights and responsibility are the legacy of American culture Expectation self absorption family deterioration and moral ambiguity threaten its continuation while global competition adds to the challenge The author frankly examines both disease and medication

Real-World Nuclear Deterrence David G. Coleman, Joseph M. Siracusa, 2006-06-30 The threat of nuclear weapons did not fade away with the collapse of the Soviet Union Rather the geopolitical disorders of the post Cold War era and the rise of global terrorism have ensured that they remain conspicuously present on the world stage as a serious international concern With the eight or nine nuclear powers maintaining about 27 000 nuclear weapons in their arsenals to this day it is clear that they are here to stay for the foreseeable future The primary mission of these nuclear forces has been and remains deterrence Using plain language rather than policy jargon this historically focused book shows how nuclear deterrence has worked rather than how it should It then shows how the growing threat of nuclear proliferation threatens to create a far more complicated international situation largely because of the attendant proliferation of state nuclear deterrents By drawing on a wide array of new sources from international archives and the latest in international scholarship Coleman and Siracusa put some of the most important and enduring problems of nuclear deterrence over the past sixty years into global context Nuclear deterrence in the real world often operates very differently from how it should according to the prevailing theories and Coleman and Siracusa take a fresh look at how nuclear weapons policy has been made finding that it often has had surprisingly little to do with what works and what does not By studying in depth how governments here and abroad have confronted and dealt with some of the most important issues in nuclear weapons policy for example How many nuclear weapons are enough and What is it that will deter they find that the making of nuclear weapons policy is a complex fluid bargaining process subject to the tides of politics budgets threat

perception ideology technology parochial service rivalries flawed information and sometimes just plain wishful thinking

**Britain and the Bomb** David James Gill, 2014-01-08 Drawing on primary sources from both sides of the Atlantic Britain and the Bomb explores how economic political and strategic considerations have shaped British nuclear diplomacy The book concentrates on Prime Minister Harold Wilson's first two terms of office 1964-1970 which represent a critical period in international nuclear history Wilson's commitment to the Non Proliferation Treaty and his support for continued investment in the British nuclear weapons program despite serious economic and political challenges established precedents that still influence policymakers today The continued independence of Britain's nuclear force and the enduring absence of a German or European deterrent certainly owes a debt to Wilson's handling of nuclear diplomacy more than four decades ago Beyond highlighting the importance of this period the book explains how and why British nuclear diplomacy evolved during Wilson's leadership Cabinet discussions financial crises and international tensions encouraged a degree of flexibility in the pursuit of strategic independence and the creation of a non proliferation treaty Gill shows us that British nuclear diplomacy was a series of compromises an intricate blend of political economic and strategic considerations

*Atomic Assurance* Alexander Lanoszka, 2018-11-15 Do alliances curb efforts by states to develop nuclear weapons Atomic Assurance looks at what makes alliances sufficiently credible to prevent nuclear proliferation how alliances can break down and so encourage nuclear proliferation and whether security guarantors like the United States can use alliance ties to end the nuclear efforts of their allies Alexander Lanoszka finds that military alliances are less useful in preventing allies from acquiring nuclear weapons than conventional wisdom suggests Through intensive case studies of West Germany Japan and South Korea as well as a series of smaller cases on Great Britain France Norway Australia and Taiwan Atomic Assurance shows that it is easier to prevent an ally from initiating a nuclear program than to stop an ally that has already started one in theater conventional forces are crucial in making American nuclear guarantees credible the American coercion of allies who started or were tempted to start a nuclear weapons program has played less of a role in forestalling nuclear proliferation than analysts have assumed and the economic or technological reliance of a security dependent ally on the United States works better to reverse or to halt that ally's nuclear bid than anything else Crossing diplomatic history international relations foreign policy grand strategy and nuclear strategy Lanoszka's book reworks our understanding of the power and importance of alliances in stopping nuclear proliferation

*Power and International Relations* Desmond Ball, Sheryn Lee, 2014-11-25 Coral Mary Bell AO who died in 2012 was one of the world's foremost academic experts on international relations crisis management and alliance diplomacy This collection of essays by more than a dozen of her friends and colleagues is intended to honour her life and examine her ideas and through them her legacy Part 1 describes her growing up during the Great Depression and the Second World War her short lived sojourn in the Department of External Affairs in Canberra where she was friends with some of the spies who worked for Moscow and her academic career over the subsequent six decades the last three of which

were at The Australian National University Most of Coral's academic career was spent in Departments of International Relations She was disdainful of academic theory but as discussed in Part 2 she had a very sophisticated understanding of the subject She was in many ways a Realist but one for whom agency in terms of ideas the beliefs and perceptions of policy makers and institutions including conventions and norms of behaviour essentially determined events Part 3 is concerned with power politics including such matters as Cold War competitions crisis management alliance diplomacy and US and Australian foreign policies She recognised that power politics left untrammelled was inevitably catastrophic and was increasingly attracted to notions of Concerts of Power Coral would be touched by this collection of essays about her professional and personal life The contributors offer honest professional and insightful reviews of her many academic achievements and especially her ideas many of them the forerunners of others work that makes her one of the very best international relations and strategic thinkers Dr Pauline Kerr Asia Pacific College of Diplomacy The Australian National University It's a rare thing in an international relations expert to possess a balance of theory and experience history and imagination realism and hope Coral had this and she had a 19th century prose style to match it Through her writing she explained the chaos of international events and human affairs in simple and clear language to her baffled compatriots For the rest of the world she brought an antipodean temperament and perspective to the great questions of our time she was our George Kennan in thick glasses blue floral dress white sneakers and a string of pearls Minh Bui Jones The Lowy Interpreter 5 October 2012

**Earth Diplomacy** Jessica L. Horton, 2024-07-19 In *Earth Diplomacy* Jessica L Horton reveals how Native American art in the mid twentieth century mobilized Indigenous cultures of diplomacy to place the earth itself at the center of international relations She focuses on a group of artists including Pablita Velarde Darryl Blackman and Oscar Howe who participated in exhibitions and lectures abroad as part of the United States's Cold War cultural propaganda Horton emphasizes how their art modeled a radical alternative to dominant forms of statecraft a practice she calls earth diplomacy a response to extractive colonial capitalism grounded in Native ideas of deep reciprocal relationships between humans and other beings that govern the world Horton draws on extensive archival research and oral histories as well as analyses of Indigenous creative work including paintings textiles tipis adornment and artistic demonstrations By interweaving diplomacy ecology and art history Horton advances Indigenous frameworks of reciprocity with all beings in the cosmos as a path to transforming our broken system of global politics
