Financing Development Michele Fratianni, 2016-04-15 The critical challenge of financing development and sustainability is a key focus for the world's international financial institutions led by the International Monetary Fund, the World Bank, and above all the G8. This volume assesses the current practice and perspectives of the major developed world countries that dominate the boards of the IMF and the World Bank and comprise the G8. It looks at the prospects for meeting the Millennium Development Goals in the most impoverished region of Africa, the way trade and finance instruments can help, and how the challenges of energy, security, and climate change control will affect the results. This volume offers in-depth analysis of how the Millennium Development Goals are to be met. North to South resource transfers, the challenges of controlling climate control beyond Kyoto. In sum, this volume provides a critical and creative examination of what the G8 governments, especially at and after the 2005 Gleneagles summit, have done and what they should do to promote development and sustainability.
