Communication And Identity In The Diaspora:

Transnational Communication and Identity Construction in Diaspora Merga Yonas Bula, 2023-12-14 The study was sparked by the absence of literature on transnational masspersonal communication tmc of Eritrean Ethiopian Oromo and Somali diaspora communities To bridge this theoretical gap an empirical study was conducted at meso level based on three questions a what topics do people in the diaspora communities discuss in relation to their homelands via social media an alternative for tmc b how do they communicate about their homelands issues in relation to their collective identities and c how does this communication enable the construction of their own identity as well as the deconstruction of competing identities The theoretical analysis from the perspective of these questions led to developing own model i e the Diasporic Identity Construction in Transnational Masspersonal Communication Model DICTMCM This model which connects the theoretical analysis to the empirical study argues that their communication in relation to their homelands particularly about their collective identities consists not only of what they talk but also of how they converse As a result the empirical results delivered a comparative analysis of the tmc of these four diaspora communities and how they construct their collective identities via this tmc which bridged the above stated gap

Karim, Ahmed Al-Rawi, 2018-01-24 This book examines how African Asian Middle Eastern and Latin American diasporas use media to communicate among themselves and to integrate into European countries Whereas migrant communities continue employing print and broadcasting technologies

the rapidly growing applications of Internet platforms like social media have substantially enriched their interactions. These communication practices provide valuable insights into how diasporas define themselves. The anthology investigates varied uses of media by Ecuadorian, Congolese, Moroccan, Nepalese, Portuguese, Somali, Syrian, and Turkish communities residing in Belgium, Germany, Italy, the Netherlands, Spain, Sweden, and the UK. These studies are based on research methodologies including big data analysis, content analysis, focus groups, interviews, surveys, and visual framing, and they make a strong contribution to the emerging theory of diasporic media.

Diasporas in the New Media Age Andoni Alonso, Pedro Oiarzabal, 2010-04-01. The explosion of digital information and communication technologies has influenced almost every aspect of contemporary life. *Diasporas in the New Media Age* is the first book-length examination of the social use of these technologies by emigrants and diasporas around the world. The eighteen original essays in the book explore the personal, familial, and social impact of modern communication technology on populations of European, Asian, African, Caribbean, Middle Eastern, and Latin American emigrants. It also looks at the role and transformation of such concepts as identity, nation, culture, and community in the era of information technology and economic globalization. The contributors, who represent a number of disciplines and national origins, also take a range of approaches: empirical, theoretical, and rhetorical, and combine case studies with thoughtful analysis. *Diasporas in the New Media Age* is both a discussion of the use of communication technologies by various emigrant groups and an engaging account of the immigrant experience in the contemporary world. It offers important insights into the ways that dispersed populations are using digital media to maintain ties with their families and homeland and to create new communities that preserve their culture and reinforce their sense of identity. In addition, the book is a significant contribution to our understanding of the impact of technology on society in general.

identity race class and gender globalization and immigration and other relevant fields *The Journal of International Communication*, 2006 *Immigrants, Citizens, and Diasporas* Kellie D. Hay, 2000 I found that while many people meet the theoretical criteria that exist in the literature on diaspora they do not necessarily identify with the concept and the concept itself turned out to be much more complex and nuanced Those who do identify with the concept stretch it so as to include immigrants and citizens in its purview My study also makes visible the ways in which the identities of second third and fourth generation Arab Americans have been affected by assimilation such that they now are busy reclaiming multiple forms of Arab identity speaking Arabic making indigenous food music dance and political advocacy Among all the Arab Americans I studied however dance emerged as a crucially important practice for performing and affirming a group ethnic identity Finally while the members of this community certainly negotiate identities that are fluid syncretic and mediated through the vicissitudes of culture power and history it also became clear that there are historically contingent forces that encourage their speaking as if in one voice
