## **Communication Problems In Autism:**

Communication Problems in Autism Eric Schopler, Gary B. Mesibov, 1985-05-31 The North Carolina State Legislature's mandate to Division TEACCH has three major components: First to provide the most up to date and cost effective services possible for families with autistic or similar language impaired children; second to conduct research aimed toward the better understanding of such devastating disorders; and third to provide training for the professionals needed to pursue these goals. One element in achieving these aims is to hold annual conferences on topics of special importance to the understanding and treatment of autism and similar disorders. In addition to training professionals and parents on the most recent developments in each conference topic, we are publishing a series *Current Issues in Autism* based on these conferences. These books are not however simply the published proceedings of the conference papers. Instead, some chapters are expanded conference presentations, whereas others come from national and international experts whose work is beyond the scope of the conference but essential in our attempt at comprehensive coverage of the conference theme. These volumes are intended to provide the most current knowledge and professional practice available to us at the time. *Sleep Disturbance in Children and Adolescents with Disorders of Development* Gregory Stores, Luci Wiggs, 2001-01-16 This is a comprehensive and up to date review of the nature, causes, assessment, and management of sleep disturbance in developmental disorders.

Communication Issues in Autism and Asperger Syndrome Olga Bogdashina, 2005 Providing a theoretical foundation for understanding communication and language impairments specific to autism, Olga Bogdashina explores the effects of different perceptual and cognitive styles on the communication and language development of autistic children. She stresses the importance of identifying each autistic individual's nonverbal language, which can be visual, tactile, kinaesthetic, auditory, olfactory, or gustatory, with a view to establishing a shared means of verbal communication. She offers an explanation of why certain approaches, for example PECS, might work with some autistic children but not others. Offering real insights, the *What They Say* sections enable the reader to see through the eyes of autistic individuals and to understand their language differences first hand. *What We Can Do to Help* sections throughout the book give practical recommendations on what to do in order to help autistic individuals use their natural mechanisms to learn and develop social and communicative skills. The final chapters are devoted to assessment and intervention issues with practical recommendations for selecting appropriate methods and techniques to enhance communication based on the specific mode of communication a person uses. **Inside**, 1997 Language and Treatment of Autistic and Developmentally Disordered Children Thomas L. Layton, 1987

*Breaking Down Communication Barriers of Children with Autism* Jeffrey Perkins, 2008-12-01 Provides an introduction to communication problems in autistic children along with tips and strategies for breaking communication barriers.
