Mihailescu,2013-10-22 This volume is the result of an international comparative research project entitled The Future of Rural Communities in Industrialized Societies The presentation of national studies led to discussions on the methods of local studies on their theoretical basis and on their scientific and practical use It is these discussions which are featured in this book The national studies themselves are now published by Pergamon Press in volumes I and II of Rural Community Studies in Europe with a third volume to come **The Community in Urban Society** Larry Lyon,Robyn Driskell,2011-12-16 The community is more than an abstract object of theoretical inquiry It is also a place where people live It is difficult to determine where community research and theory merge because the community is a unique place where theory and the real world come together Local conditions change and new research techniques emerge In the second edition of The Community in Urban Society the authors solve this problem by distilling the historic and foundational theories of community applying traditional approaches typology ecology systems theory and conflict theory to current conditions and exploring new and relevant theories that impact today's communities The latest edition also examines recent and emerging technologies that facilitate examination and evaluation of the modern community condition Updated coverage includes topics such as New Urbanism modern network analysis methods the urban political economy approach to community the growth machine approach GIS mapping recent holistic studies cyberspace communities and up to date discussions of community indicator studies quality of life community power and regime politics Urban Latin America Alejandro Portes,John Walton,2014-09-10 Much research on the city in developing societies has focused mainly on one of three areas planning demography or economics and has emphasized either power elites or the masses but not both The published literature on Latin America has reflected these interests and has so far failed to provide a comprehensive view of Latin American urbanization Urban Latin America is an attempt to integrate research on Latin American social organization within a single theoretical framework development as fundamentally a political problem Alejandro Portes and John Walton have included material on both elites and marginal populations and on the three major areas of research in order to formulate and address some of the key questions about the structure of urban politics in Latin America Following an introduction that delineates the scope of Latin American urban studies Portes discusses the Latin American city as a creation of European colonialism He goes on to examine political behavior among the poor with central reference to system support and countersystem potential Walton provides material for a comparative study of four cities Monterrey and Guadalajara in Mexico and Medell n and Cali in Colombia He also summarizes a large number of urban elite studies and develops a theoretical interpretation of their collective results based on class structure and vertical integration Material in each chapter is cross referenced to other chapters and the authors have used a common methodological approach in synthesizing and

interpreting the research literature In the final chapter they generalize current findings elaborating on the interface between elite and mass politics in the urban situation They make some observations on approaching changes and pinpoint possible research strategies for the future *Critical Pluralism, Democratic Performance, and Community Power* Paul
