Computer Science

"Computer Science is changing more rapidly than any other discipline on campus." This observation was made by department head David Moursund.

Computer theory is a very important aspect of the curriculum and is stressed at the UO. It provides a sound base of background education for students to retain as computers and programming techniques change. Only about half of the technical skills gained by a Computer Science major will be used in the same way four years after graduation. It is estimated that the professional must devote 22 hours of reading per week just to keep up to date in this dynamic field.

Students doing programs as class assignments either operate teletypes themselves or submit their programs to be run on a "Batch" basis at the Computing Center. Because it can be viewed as a tool to gaining knowledge much as math and reading, Computer Science is included in the College of Liberal Arts.
