Computer Simulation Of Behavior:

The Computer Simulation of Behaviour Michael J Apter, 2018-05-15 This book originally published in 1970 concerns the new technique of computer simulation in psychology at the time Computer programs described include models of learning problem solving pattern recognition the use of language and personality More general topics are discussed including the evaluation of such models the relation of the field to cybernetics and the problem posed by consciousness Today it can be read and enjoyed in its historical context

Computer Simulation of Human Behavior John M. Dutton, William H. Starbuck, 1971 Computer Simulation of Human Behavior Edward A. Feigenbaum, General Motors Corporation. AC Spark Plug, 1963 Based on a survey of the literature the digital computer as a simulator of human behavior is discussed under the following topics 1 Computers as information processors 2 Human information processing 3 Information processing theory and computer simulation 4 Computer simulation within existing frameworks 5 New information processing models

Steinhauer, 1986 **Motivation and Intensionality in a Computer Simulation Model** William S. Faught, Stanford University. Computer Science Department, 1977 This dissertation describes a computer simulation model of paranoia The model mimics the behavior of a patient participating in a psychiatric interview by answering questions introducing its own topics and responding to negatively valued e.g. threatening or shame producing situations The work focuses on the motivational mechanisms required to instigate and direct the modelled behavior Major components of the model are 1 A production system PS formalism accounting for the instigation and guidance of behavior as a function of internal affective and external real world environmental factors 2 A model of affects emotions as an anticipation mechanism based on a small number of basic pain pleasure factors and 3 a formalism for intensional behavior directed by internal models requiring a dual representation of symbol and concept An intensional object belief can be accessed either by sensing it in the environment concept or by its name token Similarly an intensional action intention can be specified either by its conditions in the immediate environment concept or by its name token Issues of intelligence psychopathological modelling and artificial intelligence programming are discussed The paranoid phenomenon is found to be explainable as an extremely skewed use of normal processes Applications of these constructs are found to be useful in AI programs dealing with error recovery incompletely specified input data and natural language specification of tasks to perform

Computer Science in Social and Behavioral Science Education Daniel Edgar Bailey, 1978 **Systems Modeling and Computer Simulation** Naim Kheir, 2018-12-12 This second edition describes the fundamentals of modelling and simulation of continuous time discrete time discrete event and large scale systems Coverage new to this edition includes a chapter on non linear systems analysis and modelling complementing the treatment of of continuous time and discrete time systems and a chapter on the computer animation and visualization of dynamical systems motion
