Spatio-Temporal Databases Rita de Caluwe,Guy De Tré,Gloria Bordogna,2013-04-17 Spatio Temporal Databases explores recent trends in flexible querying and reasoning about time and space related information in databases It shows how flexible querying enhances standard querying expressiveness in many different ways with the aim of facilitating extraction of relevant data and information Flexible spatial and temporal reasoning denotes qualitative reasoning about dynamic changes in the spatial domain characterized by imprecision or uncertainty or both Many of the contributions focus on GIS while some others are more general or focus on related application fields presenting theoretical viewpoints and techniques that are inspiring or can be adapted for GIS The first part bundles the contributions on advances at the theoretical level also discussing examples and opening further perspectives The second part presents contributions on well developed applications The authors explain how to handle imprecision and uncertainty demonstrating how advanced techniques can help to solve diverse problems related to GIS **Designing Natural Language Interfaces** Edwin Addison,1990 **Computational Intelligence** De-Shuang Huang,George William Irwin,2006-08-04 This is the proceedings of the International Conference on Intelligent Computing ICIC 2006 Kunming China August 2006 The book presents 165 revised full papers carefully chosen and reviewed organized in topical sections on fuzzy systems fuzzy neuro evolutionary hybrids supervised unsupervised and reinforcement learning intelligent agent and Web applications intelligent fault diagnosis natural language processing and expert systems natural language human machine interface using artificial neural networks and intelligent financial engineering **Computerworld** ,1986-12-01 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network **Analysis, Design and Evaluation of Man-Machine Systems 1988** J.
