Engineering Human Computer Interaction and Interactive Systems Rémi Bastide, Philippe Palanque, Jörg Roth, 2005-07-04 As its name suggests the EHCI DSVIS conference has been a special event merging two different although overlapping research communities EHCI Engineering for Human Computer Interaction is a conference organized by the IFIP 2.7.13.4 working group started in 1974 and held every three years since 1989 The group's activity is the scientific investigation of the relationships among the human factors in computing and software engineering DSVIS Design Specification and Verification of Interactive Systems is an annual conference started in 1994 and dedicated to the use of formal methods for the design of interactive systems Of course these two research domains have a lot in common and are informed by each other's results The year 2004 was a good opportunity to bring closer these two research communities for an event the 11th edition of DSVIS and the 9th edition of EHCI EHCI DSVIS was set up as a working conference bringing together researchers and practitioners interested in strengthening the scientific foundations of user interface design specification and verification and in examining the relationships between software engineering and human computer interaction The call for papers attracted a lot of attention and we received a record number of submissions out of the 65 submissions 23 full papers were accepted which gives an acceptance rate of approximately 34% Three short papers were also included The contributions were categorized in 8 chapters Chapter 1 Usability and Software Architecture contains three contributions which advance the state of the art in usability approaches for modern software engineering

[Interactive Systems: Design, Specification, and Verification](#) Bodo Urban, Jean Vanderdonckt, Quentin Limbourg, 2003-07-01 This book constitutes the thoroughly refereed post proceedings of the 9th International Workshop on the Design Specification and Verification of Interactive Systems DSVIS 2002 held in Rostock Germany in June 2002 The 19 revised full papers presented have gone through two rounds of reviewing selection and improvement All aspects of the design specification and verification of interactive systems from the human computer interaction point of view are addressed Particular emphasis is given to models and their role in supporting the design and development of interactive systems and user interfaces for ubiquitous computing

Designing Interactive Software Greg Kearsley, Robin Halley, 1985 *The Principles of Interactive Design* Lisa Graham, 1999 Communication fundamentals are used as guidelines for interactive development for platforms such as multimedia and the World Wide Web The reader is taught how to approach the interactive project as a communication tool while incorporating various media communication principles user interfaces interactive design and implementation to build a successful product Publisher description

Trends in Interactive Visualization Elena Zudilova-Seinstra, Tony Adriaansen, Robert van Liere, 2008-12-17 II Challenges in Data Mapping Part II deals with one of the most challenging tasks in Interactive Visualization mapping and

teasing out information from large complex datasets and generating visual representations This section consists of four chapters Binh Pham Alex Streit and Ross Brown provide a comprehensive requirement analysis of information uncertainty visualizations They examine the sources of uncertainty review aspects of its complexity introduce typical models of uncertainty and analyze major issues in visualization of uncertainty from various user and task perspectives Alfred Inselberg examines challenges in the multivariate data analysis He explains how relations among multiple variables can be mapped uniquely into space subsets having geometrical properties and introduces Parallel Coordinates methodology for the unambiguous visualization and exploration of a multidimensional geometry and multivariate relations Christiaan Gribble describes two alternative approaches to interactive particle visualization one targeting desktop systems equipped with programmable graphics hardware and the other targeting moderately sized multicore systems using pack based ray tracing Finally Christof Rezk Salama reviews state of the art strategies for the assignment of visual parameters in scientific visualization systems He explains the process of mapping abstract data values into visual based on transfer functions clarifies the terms of pre and postclassification and introduces the state of the art user interfaces for the design of transfer functions

Design, Specification and Verification of Interactive Systems '97 Michael D. Harrison, Juan C. Torres, 2012-12-06

An increasing recognition of the role of the human system interface is leading to new extensions and styles of specification Techniques are being developed that facilitate the expression of user oriented requirements and the refinement and checking of specifications of interactive systems This book reflects the state of the art in this important area and also contains a summary of working group discussions about how the various techniques represented might be applied to a common case study
