Keys for Writers Fourth Edition, Custom Publication Ann Raimés, Raimés, 2004-06 **Foundation Flash 8** Sham Bhangal, Kristian Besley, 2006-11-07 Foundation Flash 8 is the book you need if you're looking for a solid foundation in Flash 8 Basic and Flash 8 Professional. Thousands upon thousands of designers have already learned from its previous editions and it's easy to understand why. The fourth edition of friends of ED's legendary beginner Flash book Foundation Flash 8 uses a series of structured exercises and detailed discussions to help you start your exploration of Flash. The detailed tutorial style will ensure that you retain the knowledge you gain and are able to draw upon it throughout your Flash career. Foundation Flash 8 features a running case study that evolves into a fully functional Flash website as you work through the tutorials so you'll immediately see everything that you learn being used in a practical project. This book focuses on the core skills that you need to get started working with Flash 8: understanding the interface, becoming familiar with the creative tools and their capabilities, grasping the relationships between the different components that make up a Flash movie, and getting insight into how to put all the pieces together to create your own Flash-based website. *Semantic Mashups* Brigitte Endres-Niggemeyer, 2013-04-05 Mashups are mostly lightweight Web applications that offer new functionalities by combining, aggregating, and transforming resources and services available on the Web. Popular examples include a map in their main offer for instance for real estate hotel recommendations or navigation tools. Mashups may contain and mix client-side and server-side activity. Obviously, understanding the incoming resources, services, statistical figures, text, videos, etc. is a precondition for optimally combining them so that there is always some undercover semantics being used. By using semantic annotations, neutral mashups permute into the branded type of semantic mashups. Further and deeper semantic processing such as reasoning is the next step. The chapters of this book reflect the diversity of real-life semantic mashups. Two overview chapters take the reader to the environments where mashups are at home and review the regulations, standards, guidelines, etc. mashups are based on and confronted with. Chapters focusing on DBpedia, search engines, and the Web of Things inspect the main Web surroundings of mashups. While mashups upgrading search queries may be nearer to the everyday experience of readers, mashups using DBpedia input and sensor data from the real world lead to important new and therefore less known developments. Finally, the diversity of mashups is tracked through a few application areas: mathematical knowledge, speech crisis, and disaster management recommendations for games, inner-city information, and tourism. Participants of the AI Mashup Challenge wrote all the chapters of this book. The authors were writing for their current and future colleagues, researchers, and developers all over the Web who integrate mashup functionalities into their thinking and possibly into their applications. *Government Gazette*, 1911 LMP 2007, 2006 Volume 1 covers core publishing industry information: book publishers, editorial services, and agents, associations, events, courses, and awards, and books and magazines for the trade.
