*Stories of Vigilant Courage* Adam Hildebrand,2008-08 If you find yourself at the bedside of a child with multiple handicaps and complex medical needs you need to read this book Whether you are a nurse doctor parent or family member health care professional or a personal ally of an individual who is disabled you will benefit from reading the stories in the book and the analysis of issues by the editor It sometimes happens that some people whether a professional or not will be tempted to think of such children as better off dead an extremely dangerous assumption Illness and suffering do not diminish

the value of a person's life and no one has the right to decide whether or not a person should live or die. This book gives firsthand accounts of the experiences of handicapped children and their families in health care settings. Their experiences vary from doctor to doctor, nurse to nurse, and hospital to hospital. The key difference is that some people held a strong belief that every person's life has intrinsic value and that their lives were sacred. Yet others measured the value of a life according to external factors such as level of disability, impairments, and level of suffering, whether presumed or real. You can guess which people gave better care and which children lived longer and better accordingly. In spite of the difficult challenges that handicapped children and their families face as described in these stories, this book is a book of hope. You will be inspired by the courageous tenacity of parents who literally stood at the bedside of their children, often for months, and protected and affirmed the well-being of their child. This is a book about people who made a difference, a difference between life and death.

**Harming Future Persons** Melinda A. Roberts, David T. Wasserman, 2009-07-31 Melinda A. Roberts and David T.

Wasserman 1 Purpose of this Collection What are our obligations with respect to persons who have not yet and may not ever come into existence? Few of us believe that we can wrong those whom we leave out of existence altogether, that is, merely possible persons. We may think as well that the directive to be fruitful and multiply and replenish the earth 1 does not hold up to close scrutiny. How can it be wrong to decline to bring ever more people into existence? At the same time, we think we are clearly obligated to treat future persons, persons who don't yet but will exist in accordance with certain stringent standards. Bringing a person into an existence that is truly awful, not worth having, can be wrong, and so can bringing a person into an existence that is worth having when we had the alternative of bringing that same person into an existence that is substantially better. We may think as well that our obligations with respect to future persons are triggered well before the point at which those persons commence their existence. We think it would be wrong, for example, to choose today to turn the Earth of the future into a miserable place, even if the victims of that choice do not yet exist.
