Abbe Brady, Gloucestershire University. The capacity to think critically is essential for success in sport courses in higher education. This book provides all those involved in the study of sport with the tools to assess, construct, and present arguments and to analyse and evaluate material. The emphasis is on the application of critical thinking in the form of written arguments, discussion, and negotiation. Throughout the text, examples are presented within the context of sport, helping students to more easily apply their learning to their subject area.

How to Think Critically Jeff McLaughlin, 2014-08-08. Jeff McLaughlin's *How to Think Critically* begins with the premise that we are all every day engaged in critical thinking. But as we may develop bad habits in daily life if we don't scrutinize our practices, so we are apt to develop bad habits in critical thinking if we are careless in our reasoning. This book exists to instill good thinking habits: attentiveness to word choice, avoidance of fallacies, and effective construction and assessment of arguments. With relatable and often amusing examples included throughout, the book adopts a degree of technical sophistication that is rigorous and yet still easily applied to ordinary situations. Readers are presented with a traditional step-by-step method for analysis that can be applied to all argument forms. Hundreds of exercises with solutions are included, as are several random statement generators which can be used to create thousands of additional examples. Venn diagrams, truth tables, and other essential concepts are presented not as definitions for academic study but as tools for better thinking and living.
