THE AVOIDABLE WAR

The Dangers of a
Catastrophic Conflict between the
US and Xi Jinping's China

KEVIN RUDD

Avoidable War

Alfred Emanuel Smith, Francis Walton

Avoidable War:

The Avoidable War Kevin Rudd, 2022-03-22 A war between China and the US would be catastrophic deadly and destructive Unfortunately it is no longer unthinkable The relationship between the US and China the world's two superpowers is peculiarly volatile It rests on a seismic fault of cultural misunderstanding historical grievance and ideological incompatibility No other nations are so quick to offend and be offended Their militaries play a dangerous game of chicken corporations steal intellectual property intelligence satellites peer and AI technicians plot The capacity for either country to cross a fatal line grows daily Kevin Rudd a former Australian prime minister who has studied lived in and worked with China for more than forty years is one of the very few people who can offer real insight into the mindsets of the leadership whose judgment will determine if a war will be fought The Avoidable War demystifies the actions of both sides explaining and translating them for the benefit of the other Geopolitical disaster is still avoidable but only if these two giants can find a way to coexist without betraying their core interests through what Rudd calls managed strategic competition Should they fail down that path lies the possibility of a war that could rewrite the future of both countries and the world [Navigating the Polycrisis](#) Michael J. Albert, 2024-04-23 An innovative work of realism and utopianism that analyzes the possible futures of the world system and helps us imagine how we might transition beyond capitalism The world system of which we are all a part faces multiple calamities climate change and mass extinction the economic and existential threat of AI the chilling rise of far right populism and the invasion of Ukraine to name only a few In Navigating the Polycrisis Michael Albert seeks to illuminate how the planetary polycrisis will disrupt the global community in the coming decades and how we can best meet these challenges Albert argues that we must devote more attention to the study of possible futures and adopt transdisciplinary approaches to do so To provide a new form of critical futures analysis he offers a theoretical framework planetary systems thinking that is informed by complexity theory world systems theory and ecological Marxism Navigating the Polycrisis builds on existing work on climate futures and the futures of capitalism and makes three main contributions First the book brings together modeling projections with critical social theory in a more systematic way than has been done so far Second the book shows that in order to grasp the complexity of the planetary polycrisis we must analyze the convergence of crises encompassing the climate emergency the structural crisis of global capitalism net energy decline food system disruption pandemic risk far right populism and emerging technological risks e.g. in the domains of artificial intelligence biotechnology and nuclear weapons And third the book contributes to existing work on postcapitalist futures by analyzing the processes and mechanisms through which egalitarian transitions beyond capitalism might occur A much needed work of global futures studies Navigating the Polycrisis brings together the rigor of the natural and social sciences and speculative imagination informed by science fiction to forge pathways to our possible global future **Breaking the South Slav Dream** Kate Hudson, 2003-06-20 This is a revisionist history of the rise and fall of Yugoslavia Assessing the geopolitical and strategic

reasons for its creation and dismemberment it is an important corrective to much contemporary theorising about the destruction of the Yugoslav state Kate Hudson draws attention to the role of foreign states whose involvement in Yugoslavia did much to destabilise the region and explains how and why this happened Tracing the state's origins from 1918 through war and the Tito years she explains the distortion of the socialist economy resulting from Yugoslavia's unusual position between the two Cold War blocs and the economic collapse of the 1980s as part of the US's drive for a free market She also investigates the true causes and effects of the recent wars in Croatia Bosnia and Kosovo and brings the book up to date with an analysis of Milosevic's downfall and events in Macedonia and Montenegro

Summary of Kevin Rudd's The Avoidable War Everest Media,2022-04-09T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 China has long understood the importance of understanding America as the Chinese Communist Party believes their survival depends on it However America has rarely felt the need to understand China as their geopolitical footprint is so large 2 China's history is one of periodic incursions by foreign invaders Chinese official culture has long taken pride in its ability to Sinify invaders within a generation of their arrival through the inherited norms practices and procedures of China's formidable Confucian bureaucratic state 3 The Americans were the dominant Christian presence in China after the Chinese government forced out the Europeans in the First Opium War in 1839 American missionaries led the way in the establishment of Western hospitals colleges and universities in China 4 The American relationship with China changed with the American Revolution The United States replaced Britain as China's principal interlocutor with the West However American policies towards China were influenced by questions of race

Megathreats Nouriel Roubini,2022-10-18 Read and pay attention Martin Wolf the Financial Times the bestselling author of *Crisis Economics* argues we are heading toward the worst economic catastrophe of our lifetimes unless we can defend against ten terrifying threats Renowned economist Nouriel Roubini was nicknamed Dr Doom until his prediction of the 2008 housing crisis and Great Recession came true when it was too late Now he is back with a much scarier prediction one that we ignore at our peril There are no fewer than ten overlapping interconnected threats that are so serious he calls them Megathreats From the worst debt crisis the world has ever seen to governments pumping out too much money to borders that are blocked to workers and to many shipments of goods to the rise of a new superpower competition between China and the U S to climate change that strikes directly at our most populated cities we are facing not one not two but ten causes of disaster There is a slight chance we can avoid them if we come to our senses but we must act now In the 1970s the U S faced stagflation high rates of inflation combined with stagnant employment and growth Today we are heading toward a Great Stagflation that will make the 1970s look like a walk in the park
